## MEGA® and MEGA® Clear Top Fuse Rated 32V

The MEGA® Fuse is designed for high current circuit protection up to 500A with "Diffusion Pill Technology." The MEGA® Fuse also provides time delay characteristics. Designed and patented by Littelfuse, the MEGA® Fuse is ideal for battery and alternator protection application and other heavy gauge cables requiring ultra-high current protection.

1: Not mentioned in ISO standards

2: Short Circuit Protector only

3: 0298xxx.ZXB has white font color on all ratings.

4: Voltage Drop measurements for short circuit protectors taken at 75% of rated current.

The typical I<sup>2</sup>t is an average value calculated from the breaking capacity tests by using the melting time before the arcing occurs.

### **Typical Derating**

Temperature Security Margin is 20% Please contact Littelfuse® for Details Regarding Derating Test Set-Up.

Derating curves may change depending on the final condition of the application (terminals characteristics, wire size etc..] Please ask Littelfuse for more information.
