

MATERIAL REDUCTION OPPORTUNITY PROGRAM

Expertise Applied | Answers Delivered

Material Reduction Opportunity Program

The Littelfuse® POWR-GARD® exclusive MROplus program has been helping our customers lower costs, increase plant safety, decrease downtime and reduce inventory for over 15 years. Our Tech Center will analyze your fuse inventory and within 24 hours generate detailed reports that will ensure you are using the best circuit protection available. This decreases the risk of electrical hazards within your facility, while saving time and money. All you have to do is supply a list of your current fuse inventory and the MROplus program will do the rest. Best of all... it is absolutely FREE!

WHAT CAN MROplus DO FOR YOU?

Lower Costs

MROplus helps you upgrade circuit protection, increase safety, reduce fuse inventory, decrease downtime and improve productivity. These improvements amount to money saved.

Improve Safety

Identify inadequate fuses and upgrade them to current-limiting circuit protection to reduce Hazard Risk Categories in any type of facility. In accordance to NFPA 70E, when reducing the HRC, workers are allowed to wear less PPE allowing repairs to be made quickly which minimizes time spent in live panels.

Decrease Downtime

Improve productivity with MROplus by converting to Indicating Fuses and consolidating inventory. Indication takes the guesswork out of fuse replacement and makes identifying an open fuse instant, resulting in time and money saved.

Reduce Inventory

Eliminate duplicate or obsolete products and maintain only the products necessary for operation. This reduces SKUs, gets rid of waste and ensures the best protection available. Refer to the Fuse Consolidation Guide on the back cover to see how this is done.

The FREE MROplus program includes:

- ✓ Total Cost Savings Report
 - Identifies annual savings with Littelfuse fuses
 - Identifies savings from SKU reduction
- ✓ Consolidated Part Number Report
 - Cross reference Littelfuse products
- ✓ SKU Reduction Report
 - Eliminate unnecessary part numbers
 - Reduce inventory
 - Realize cost savings
- ✓ Downtime Savings Report
- ✓ Fuse Performance Summaries
 - Cost savings related to Littelfuse indicating fuse performance
- ✓ Optional bin labels with bar code scanning for organized storage

To realize the benefits of the MROplus program, supply a spreadsheet of current fuse inventory and Littelfuse will do the rest. **Simply contact your local Littelfuse Sales Representative , 1-800-TEC-FUSE or techline@littelfuse.com** today to have your inventory analyzed free through the exclusive Littelfuse MROplus Program!

TECHLINE@LITTELFUSE.COM 800-TEC-FUSE

Littelfuse® POWR-GARD® has helped OEM engineers, consulting engineers and end users select the right products to protect critical electrical equipment—all supported by our full line of product catalogs and reference materials.

POWR-GARD® Products Catalog

Littelfuse POWR-GARD offers a complete circuit protection portfolio, including time-saving indication products for immediate visual blown-fuse identification, even on de-energized systems.

Vertical Market Literature

Littelfuse understands the importance of different markets and their applications. Our vertical market literature offers a unique perspective into application specific products and the markets they serve.

LF Series Fuse Block

The DIN-rail mountable LF Series indicating fuse blocks offer fuse covers, a smaller footprint, local indication and universal mounting holes to simplify installations and reduce troubleshooting time.

Protection Relays Catalog

The comprehensive line of electronic and microprocessor-based protection relays safeguard equipment and personnel to prevent expensive damage, downtime or injury due to electrical faults.
