## MS Series High-Speed Fuse Microswitch

Microswitch for Square Body Fuse

### Description

Littelfuse MS series external mount microswitches offer permanent blown fuse indication to PSR, PSX and ESR series high-speed square-body semiconductor fuses. They have one normally open (N.O.) and one normally closed (N.C.) contact rated for 4 A, 250 V AC. These microswitches have a visual red flap or arm indicator that releases after fuse blown condition and can also be used for resetting the microswitch contacts.

#### FEATURES

Available in three sizes to fit PSR, PSX and ESR series fuses

Red flap visual indicator and contact reset mechanism

### Specifications

<b>Voltage Rating</b>	See Electrical Characteristics table
<b>Amperage Rating</b>	See Electrical Characteristics table
<b>Operating Temperature</b>	-25 °C to +125 °C
<b>Relative Humidity</b>	85%
<b>Contact</b>	Silver-nickel plated copper
<b>Approvals</b>	Internal microswitch part number: MS1-16Z0-A200 recognized under UL File : E176213
<b>Flammability</b>	UL 94 V0
<b>Environmental</b>	RoHS Compliant
<b>Country of Origin</b>	China

### Mounting Method

#### Step 1

Fix the two M4 x 0.7 screws on the external indicator switch up to its screw heads.

#### Step 2

Align the two screws straight to the fuse indicator terminals.

#### Step 3

Tighten the screws to the fuse indicator terminals at its maximum recommended torque values.

#### Step 4

Recommended external indicator switch screws tightening torque:  
0.6 to 0.8 Nm or  
5.3 to 7 in-lbs
