# Solar-Rated Products by Application

With over 60 million devices installed in photovoltaic power systems, Littelfuse understands the global challenges of the solar market. Littelfuse offers numerous circuit-protection products that are uniquely suited to protect the equipment and systems subject to the harsh environments of standard photovoltaic installations.

Look for this logo to indicate products that are used in solar applications. Visit our website [Littelfuse.com/Solar](https://www.littelfuse.com/Solar) for the latest updates on approvals, certifications, and new products.

## SPXV SERIES IN-LINE SOLAR FUSE

1500 V dc • 1–60 A

1

### Description

The Littelfuse SPXV solar string fuse has been specifically designed for the protection of photovoltaic (PV) systems.

It is available in multiple ampere ratings to match various requirements in a range of applications.

### Features/Benefits

- Offers higher amperage protection in less space for increased design flexibility
- Full range, fast-acting fuse helps eliminate common low-overload faults
- Up to 50,000 A interrupting rating

### Applications

- Inverters
- Combiner boxes

### Recommended Accessories

#### 1–32 Amperes

**Fuse Holder:** LFPXV001

**Fuse Clips:** 125003

#### 35–60 Amperes

**Fuse Block and Cover:** LFXV15060-BC

## SPXI SERIES IN-LINE SOLAR FUSE

1500 V dc • 1–60 A

1

### Description

The Littelfuse SPXI solar fuse is specifically designed for the protection of photovoltaic (PV) systems. It integrates into an in-line assembly within a wire harness and can be electrically insulated by either overmolding or using heat-shrink.

Littelfuse offers multiple ampere ratings to match specific requirements in a variety of applications.

### Features/Benefits

- Offers higher amperage protection in less space for increased design flexibility
- One-piece cap design, without joints, offers easier wire crimping and more streamlined molding
- No fuse holder required helps save space, time, and money
- 50,000 A interrupting rating

### Applications

- Photovoltaic high-capacity homerun, trunk harness, and wire harness

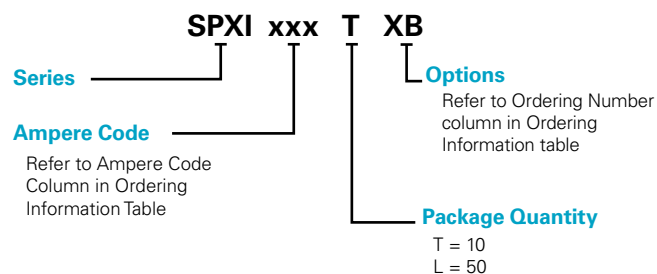

### Recommended Crimping Tool

10-12 AWG: T&B Sta-Kon ERG4002  
8 AWG: T&B Sta-Kon ERG4  
6 AWG: Burndy MRC840AL

## SPNH SERIES SOLAR FUSE

1500 V dc • 50–400 A • NH Style

1

### Description

The SPNH series has been designed to meet the emerging circuit protection needs for 1500 volt photovoltaic systems. These fuses provide full range protection for all potential overcurrent conditions that exist in PV applications. Suitable for PV inverter protection and array combiner applications.

### Features/Benefits

- Compact NH XL sizes
- Low watt loss design
- 1500 V dc rating for high efficiency designs
- Designed to protect against a full range of overcurrents

### Applications

- Inverters
- Re-combiner boxes
- Array/re-combiner application
- PV inverter dc input protection

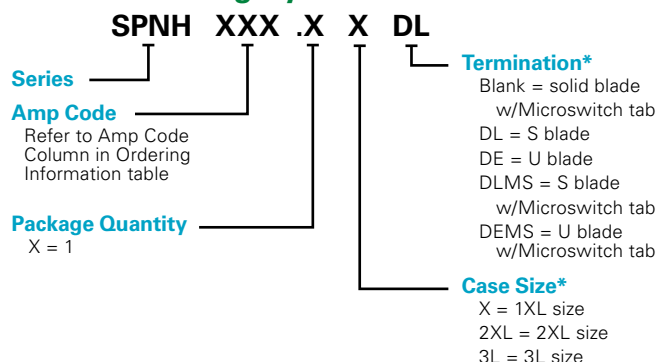

### Web Resources

- Download technical documents: [Littelfuse.com/SPNH](https://www.littelfuse.com/SPNH)

## LFXV15 SERIES FUSE BLOCK & COVER

1500 V • 35–60 A

REACH    

1

### Description

The Littelfuse LFXV15 series fuse block and cover is designed to hold 1500 V size 20 x 127 mm fuses rated 35–60 amperes. Suitable for photovoltaic systems (string and high-capacity combiner boxes) with fault currents up to 50 kA.

With available ampere ratings up to 60 A, more strings can be pre-combined in harnesses to reduce the number of inputs into combiner boxes, thereby decreasing installation time and labor costs.

### Features/Benefits

- Dead-front cover design offers personnel protection
- Ventilated design keeps the fuse running cooler, even at high ambient temperatures and current ratings, to increase fuse longevity
- Narrower width accommodates more blocks in a panel to maximize space
- Designed for easy fuse removal and replacement to minimize maintenance time. No tools required
- 35 mm DIN-rail mounting option for quick assembly and installation
- Accepts both wire and busbar for added flexibility
- Positive lock feature secures the fuse puller in the block when the fuse is absent

### Recommended Fuses

Littelfuse SPXV 20 x 127 mm fuses rated 35–60 amperes.

## LFNH SERIES FUSE BLOCK

1

### Description

The LFNH series fuse block is specifically designed for the Littelfuse SPNH 1500 V solar fuse. It meets UL electrical requirements, is available in multiple case sizes and has an optional cover to enclose the lugs.

### Features/Benefits

- Narrow width increases space savings
- Range of amperages to match all SPNH fuse options

### Specifications

<b>Voltage Rating</b>	1500 V dc
<b>Ampere Rating</b>	200, 400, 630 A

## SPFJ SERIES SOLAR FUSE

1000 V dc • 70–450 A • Full Range • Solar-Rated

2

### Description

The SPFJ series is the smallest 1000 V dc 70–450 A dc full range fuse available in the market. The SPFJ series is manufactured in Class J case sizes and is suitable for photovoltaic, dc cable protection, EV off-board charging and other dc applications that allow for both fuse holder and busbar mounting configurations. The SPFJ meets both UL and IEC requirements.

### Features & Benefits

- Higher amperage capacity in standard sizes for more protection in a smaller space
- Full range over-current protection capability, suitable for dc cable protection
- Small footprint offers design flexibility and reduces panel size requirements
- Fuse holder or bus bar mountings available for added versatility

### Applications

- Inverters
- Re-combiner boxes
- Dc cable protection
- EV off-board (dc fast) chargers

### Recommended Fuse Holder

LFI1000 Solar Series

## SPF SERIES SOLAR FUSES

1000 V dc • 1–30 A

△ UL SP CE gPV RoHS REACH

### Description

The SPF Solar Protection Fuse series has been specifically designed for the protection of photovoltaic (PV) systems. This family of midget-style fuses (10 x 38 mm) can safely protect PV modules and conductors from reverse-overcurrent conditions.

As PV systems have grown in size, so have the corresponding voltage requirements. This increase in system voltage has typically been intended to minimize power loss associated with long conductor runs. Standard circuit protection devices are not designed to completely protect photovoltaic panels. However, the SPF series is UL Listed to safely interrupt faulted circuits up to this demanding voltage level.

Littelfuse offers multiple ampere ratings to match specific requirements in a variety of applications.

### Features/Benefits

- Full range, fast-acting fuse helps eliminate common low-overload faults
- Prevents power generation losses due to nuisance tripping from changes in temperature
- Both PCB mount and dead-front holder options available

### Applications

- Inverters
- Combiner boxes
- Battery charge controllers

### Recommended Accessories

Fuse Holder: LPHV 1000 V dc POWR-Safe Series  
Fuse Clips: 125003

### SPFI SERIES IN-LINE SOLAR FUSE

1000 V dc • 2–30 A

△ **UL** **CE** **gPV** **RoHS** **REACH**

2

## Description

The Littelfuse SPFI solar fuse is designed to integrate into an in-line assembly within a wire harness. It has been specifically engineered to protect photovoltaic (PV) systems meeting UL 248-19 standards. The SPFI can be electrically insulated by either overmolding or using heat-shrink.

## Features/Benefits

- One-piece cap design, without joints, offers easier wire crimping and more streamlined molding
- No fuse holder required helps save space, time, and money
- 20,000 A Interrupting Rating

## Applications

- Photovoltaic wire harness

## Dimensions mm (in)

## Specifications

## LFJ1000 SERIES SOLAR FUSE BLOCK

1000 V dc • Clip-to-Box • Stud-to-Stud • Clip-to-Stud

Clip-to-Box

Stud-to-Stud

Clip-to-Stud

### Description

The LFJ1000 series fuse block is specifically designed for the Littelfuse SPFJ 1000 V Solar Fuse. It meets UL electrical requirements, is available in multiple amperages, and comes in a variety of fuse mounting and termination configurations; fuse clip to box lug, fuse stud to wire stud and fuse clip to wire stud.

### Features/Benefits

- Narrow width increases space savings
- Range of amperages to match all SPFJ fuse options
- Box Lug termination style accommodates a wide range of cable sizes
- Stud-mounted option increases convenience
- Approval for use with copper or aluminum lugs allowing for design flexibility

## LPHV POWR-SAFE FUSE HOLDERS

1000 V dc

2

### Description

The Littelfuse LPHV fuse holder is designed to house 1000 V fuses. It is not designed for load break but is ideal for isolating photovoltaic (PV) module strings for maintenance and meets UL requirements for 1000 V solar fuse protection.

### Features/Benefits

- Touch-safe design offers protection when replacing fuses
- Compact design
- 35 mm DIN-rail mountable
- Available in 1-, 2-, 3- and 4-pole configurations
- No fuse pullers or tools required for fuse removal

### Ordering Information

## BUS BAR SYSTEM

### POWR-BAR Distribution

### Description

A key objective for panel designers is safe distribution of power to multiple fuse holders in a compact design. The Littelfuse UL 508 Listed bus bar system eliminates most wire terminations in a timesaving package. A power distribution block and associated conductors are no longer needed to feed multiple POWR-safe fuse holders.

### Features/Benefits

- Touch-safe design offers protection when replacing fuses
- Compact design
- 35mm DIN-rail mountable
- Available in one and three phase configurations
- Can be cut down to optimal size

### Recommended Fuse Holders

## KLKD SERIES 10 X 38 FUSES

600 V ac/dc • Fast Acting • 1/10–30 A

3

### Description

The KLKD series fast-acting 600 V ac/dc fuses are used in solar combiner boxes and in circuits with dc fault currents up to 50,000 A. These fuses are designed to meet both the UL and IEC photovoltaic fuse specifications and are available in standard and board-mount configurations. The KLKD midget fuses also have high-interrupting and current-limiting capability. They are intended to supplement the primary branch-circuit fuse or breaker to provide backup overcurrent protection. The KLKD fuses are non-indicating and may be used with an indicating fuse block or cover. These fuses are offered in a wide range of ampere ratings to match specific requirements in a variety of applications. Note that 1–5 A meets UL 1741 GFDI requirements.

### Features & Benefits

FEATURES	BENEFITS
<b>10x38 mm size</b>	Common dimensions used in a variety of applications
<b>Fast-acting</b>	Provides fast, reliable short-circuit response within the interrupting rating
<b>Mounting options</b>	Available in ferrule or PCB mount
<b>POWR-GARD® technology</b>	Ensures quality backup overcurrent protection
<b>UL &amp; IEC certifications</b>	Certifications to serve the global market

### Applications

- Solar combiner boxes
- Inverters
- Power supplies
- Desktop meters

## POWR-BLOKS

Distribution Blocks • Splicer Blocks • Covers

### Description

POWR-BLOKS power distribution blocks offer a safe, convenient way of splicing cables, providing a fixed junction tap-off point or splitting primary power into secondary circuits. LX2xxx-DIN series offers integral DIN-rail mount and an optional hinged safety cover.

Optional power distribution block covers provide protection against accidental shorting between poles caused by loose wires, tools, or other conductive material. They also protect personnel from accidentally contacting energized connectors.

### Applications

Typical applications include heating, air conditioning and refrigeration systems, elevator systems, material handling equipment, control panels, motor controls, switchgear, and anywhere power needs to be distributed to more than one load.

### Hinged Plastic Covers

### Connectors

Box lug connectors are designed for use with a single or multiple, solid or class B or C stranded conductor. For UL approved use of more than one conductor per connector opening, contact Littelfuse Technical Service. Manufacturers of cable terminations can furnish crimp-on sleeves for fine stranded conductors which permit these conductors to be used with box lugs.

### Ampere Ratings

The ampere rating per pole for power distribution blocks is based on the line ampacity of 75 °C insulated conductors per NEC\* Table 310.16. If 60 °C insulated conductors are used, load must not exceed the ampacity of 60 °C conductors. Use of conductors rated in excess of 75 °C is permitted (for example 90 °C), however, load must not exceed the ampacity of 75 °C conductors.

### Specifications

## 400PV SERIES SURFACE MOUNT FUSE

### 2410 Photovoltaic Fuse

### Description

Littelfuse 400PV Series is a 2410 size Surface Mount Fuse which offers relatively low resistance. It provides UL 248-19 compliant overcurrent protection for photovoltaic (PV) cells.

The 400PV series meets environment standards and is able to operate at high temperatures.

### Features & Benefits

- Wide operating temperature range
- 100% lead-free, halogen-free, and RoHS compliant
- Reliable overcurrent performance in high temperature environments
- Small and compact
- Surface mountable
- Compatible with common soldering assembly processes
- Recognized to UL/CSA 248-1 and UL/CSA 248-19

### Applications

- Photovoltaic shingles
- Photovoltaic cells

### Agency Approvals

Agency	Agency File Number	Ampere Rating
c UL US	E339112	0.375 A

### Electrical Characteristics

## 400PV SERIES SURFACE MOUNT FUSE

### 2410 Photovoltaic Fuse

#### Temperature Re-rating Curve

#### Note

Derating depicted in this curve is in addition to the standard derating of 25% for continuous operation.

#### Example

For continuous operation at 85 degrees celsius, the fuse should be derated as follows:

$$I = (0.75)(0.90)I_n = (0.675)I_n$$

#### Average Time Current Curve

#### Soldering Parameters – Reflow Soldering

Reflow Condition		Pb-free assembly
Pre Heat	- Temperature Min ( $T_{s(min)}$ )	150° C
	- Temperature Max ( $T_{s(max)}$ )	200° C
	- Time (Min to Max) ( $t_s$ )	60–180 secs
Average ramp up rate (Liquidus Temp ( $T_L$ ) to peak)		3° C/second max.
$T_{s(max)}$ to $T_L$ - Ramp-up Rate		5° C/second max.
Reflow	- Temperature ( $T_L$ ) (Liquidus)	217° C
	- Temperature ( $t_L$ )	60–150 seconds
Peak Temperature ( $T_p$ )		260 $^{+0/-5}$ °C
Time within 5° C of actual peak Temperature ( $t_p$ )		10–30 seconds
Ramp-down Rate		6° C/second max.
Time 25° C to peak Temperature ( $T_p$ )		8 minutes max.
Do not exceed		260° C
Wave Soldering		260° C, 10 seconds max.

## IGBT MODULE, HALF-BRIDGE

600/1200 V • S Package • D Package • WB Package

### Description

Half-Bridge Circuit IGBT Modules offer the high efficiency and fast switching speeds of modern IGBT technology in a robust and flexible format. Used for power control applications, Littelfuse offers IGBT modules for flexible and efficient motor control and inverter applications.

### Features

- Ultra low loss
- High ruggedness
- High short-circuit capability
- Positive temperature coefficient
- With fast free-wheeling diodes

### Benefits

- High efficiency and switching speed
- High reliability in demanding applications
- Reduced protection needs
- Easily paralleled
- Integrated solution in compact module package

### Applications

- AC motor control
- Inverter
- Motion/servo control
- Power supplies
- Photovoltaic/fuel cell

## TVS (TRANSIENT VOLTAGE SUPPRESSION) DIODES

RoHS HF

### What Are Voltage Transients?

Voltage transients are unwanted short duration surges of electrical energy. They may result from the sudden release of previously stored energy, and can come from internal and external sources. If the voltage magnitude of the transient is large enough, circuit component damage or malfunction of the circuit may result.

Transients can occur either repeatedly or as random impulses. Repeatable transients are frequently caused by the operation of other system components, such as motors, generators or the switching of reactive circuit components. Random transients, are often caused by lightning, electrostatic discharge (ESD), and other outdoor environment events.

SOURCE	VOLTAGE	CURRENT	RISE-TIME	DURATION
Lightning	25 kV	20 kA	10 $\mu$ s	50 ms
Load Switching	600 V	500 A	50 $\mu$ s	500 ms
Electromagnetic Pulse (EMP)	1 kV	300 kV	20 ns	1 ms
Electrostatic Discharge (ESD)	15 kV	30 A	1–5 ns	100 ns

### Transient Voltage Suppression Diodes

TVS Diodes are used to protect semiconductor components from high-voltage transients. Their p-n junctions have a larger cross-sectional area than those of a normal diode, allowing them to conduct large currents to ground without sustaining damage. Littelfuse supplies TVS Diodes with peak power ratings from 200 W to 30 kW, and reverse standoff voltages from 5 V to 512 V. For more information visit [Littelfuse.com/tvsdiodes](https://www.littelfuse.com/tvsdiodes)

### TVS and Solar Inverter Protection

Integration of Transient Voltage Suppression (TVS) components within solar system designs help to prevent the damaging effects of transient events and assure compliance to safety and reliability standards. Solar power inverters are vulnerable to transient voltage effects and its direct connection to other system components allows transient voltage transfer. For example:

- Lightning-induced transient events may pass through the solar array and outdoor cabling to the inverter
- Transients originating from the outside utility power grid may pass through the main circuit panel and cabling to the inverter
- Startup of motorized equipment enables vulnerabilities produced by repeated load changes
- Electrostatic discharge events generated internally and externally to the system may pass between the inverter and sensitive electronic control equipment

It is important to build surge protection in the inverter and at other locations before damaging transients may reach sensitive equipment.

## OVERVOLTAGE SUPPRESSION VARISTORS

### Protection Application and Needs

#### Description:

Microprocessor-controlled inverter with the ac output synchronized to the ac grid stores energy in utility company and maximizes photovoltaic (PV) array energy output.

#### Threats:

- Power surges on ac or dc input and ac output
- ESD threats through the communication network

#### Solutions:

1. **Ac Input:** Fuse / MOV / GDT
2. **Dc Input:** Dc-rated fuse / Unidirectional TVS / MOV
3. **Ac Output:** Fuse / TVS / MOV
4. **Local Ethernet:** MLV / SPA
5. **Outside Ethernet:** SEP series SIDACTor® device

Example: Hybrid Solar Inverter Configuration

### Varistor Products

Varistors possess characteristics that divert transient currents away from sensitive components. Littelfuse offers two types: Miniature surface mount Multi-Layer Varistors (MLVs) for small electronics applications and Metal Oxide Varistors (MOVs) for higher energy applications. For more information visit [Littelfuse.com/varistor](http://Littelfuse.com/varistor)

## SE-601 SERIES (PGR-2601)

### Dc Ground-Fault Monitor

### Simplified Circuit Diagram

### Ordering Information

ORDERING NUMBER	CONTROL POWER
SE-601-OU	120/240 V ac/V dc
SE-601-OD	12/24 V dc
SE-601-OT	48 V dc
ACCESSORIES	REQUIREMENT
SE-GRM SERIES	Required
PGA-0500	Optional
PMA-55	Optional
PMA-60	Optional

Note: For optional conformal coating please consult factory.

### Description

The SE-601 is a microprocessor-based ground-fault relay for ungrounded dc systems. It provides sensitive ground-fault protection without the problems associated with nuisance tripping. Ground-fault current is sensed using an SE-GRM Series Ground-Reference Module—a resistor network that limits ground-fault current to 25 mA. The SE-601 is used on ungrounded dc systems ranging from industrial 24 V dc control circuits to 1000 V dc solar and transportation systems.

### Features & Benefits

FEATURES	BENEFITS
<b>Adjustable pickup (1-20 mA)</b>	Ten settings provide a wide range of low-level protection
<b>Adjustable time delay (50 ms-2.5 s)</b>	Adjustable trip delay allows quick protection or delayed response
<b>Output contacts</b>	Form A and Form B output contacts for operation of separate annunciation and trip circuits
<b>Analog output (0-5 V)</b>	Provides means for connecting to a meter (PGA-0500) or a control system
<b>Non-volatile trip memory</b>	Retains trip state when de-energized to simplify troubleshooting
<b>Selectable contact operating mode</b>	Selectable fail-safe or non-fail-safe operating modes allow connection to shunt or undervoltage breaker coil
<b>Microprocessor-based</b>	No calibration required saves on maintenance cost

### Accessories

**A** **SE-GRM Series Ground-Reference Module**  
Required accessory, used to connect the SE-601 dc Ground-Fault Monitor to the dc bus.

**PGA-0500 Analog % Current Meter**  
Optional panel-mounted analog meter displays ground-fault current as a percentage of 22 mA.

### Specifications

<b>IEEE Device Numbers</b>	Dc Overcurrent Relay (76G)
<b>Input Voltage</b>	See ordering information
<b>Dimensions</b>	<b>H</b> 75 mm (3.0"); <b>W</b> 55 mm (2.2"); <b>D</b> 115 mm (4.5")
<b>Trip Level Settings</b>	1-20 mA
<b>Trip Time Settings</b>	0.05-2.5 s
<b>Output Contacts</b>	Isolated Form A and Form B
<b>Contact Operating Mode</b>	Selectable fail-safe or non-fail-safe
<b>Test Button</b>	Local
<b>Reset Button</b>	Local and remote
<b>Analog Output</b>	0-5 V
<b>Conformally Coated</b>	Consult factory
<b>Approvals</b>	CSA certified, UL Listed (E340889), CE (European Union), C-Tick (Australian)
<b>Warranty</b>	5 years
<b>Mounting</b>	DIN, surface (standard) Panel (with PMA-55 or PMA-60 adapter)

## EL731 SERIES

### Ac/Dc Sensitive Earth-Leakage Relay

#### Description

The EL731 is a microprocessor-based ac/dc Sensitive Earth-Leakage Relay that offers complete coverage for all frequencies from 0 to 6,000 Hz. Two CTs are required for the entire frequency range, or one CT can be used for only low- or high-frequency detection. An RTD/PTC sensor input allows over-temperature protection for a motor or drive. The EL731 offers metering, password-protected alarm and trip settings and optional network communications. It is primarily used to add low-level ground-fault protection to variable-speed drives, and to dc circuits.

#### Simplified Circuit Diagram

#### Ordering Information

EL731-22-X0	24 V dc	Profibus
EL731-23-X0	24 V dc	EtherNet/IP
EL731-24-X0	24 V dc	Modbus TCP

Note: When building a part number, replace the "X" with "1" for AS/NZS 2081:2011 Compliant product, "0" otherwise.

\*DeviceNet, Profibus, EtherNet/IP and Modbus TCP are trademarks of their respective owners.

#### Accessories

**EFCT Series Earth-Fault Current Transformer**  
Required zero-sequence current transformer specifically designed for low-level detection.

**AC700-CUA Series Communication Adapter**  
Optional network-interface and firmware-upgrade communications adapters field-install in EL731.

**AC700-SMK DIN-rail & Surface-mount Adapter**  
EL731 plugs into adapter for back-plane mounting.

ACCESSORIES	REQUIREMENT
EFCT Series CT	One Required
AC700-CUA Series Com. Unit	Optional
AC700-SMK Surface-Mount Kit	Optional
AC700-CVR-00 Watertight Cover (IP66) for Panel-Mount Applications	Optional
PGA-0520 Analog Meter	Optional

## SPD2 PV SERIES

Class 2 (IEC)/Type 2 (EN)/Type 1CA (UL)  
Pluggable Multi-Pole Surge Protective Device  
for PV Systems

### Description

Surge protective devices (SPDs) provide equipment protection from transient overvoltage events lasting micro-seconds. By limiting the overvoltage to the equipment during these events, costly damage and downtime can be mitigated.

The surge protective devices for solar string box and inverter applications are available in 1100 and 1500 V dc in the 3+0 configuration.

### Internal Configuration

#### Legend

- Protective Earth
- RC Optional Remote Contact
- TD Thermal Disconnection

### Features & Benefits

FEATURES	BENEFITS
<b>Capability to clamp and withstand high-energy transients</b>	Ensures low-residual voltage during high-energy surge events and higher nominal discharge current to prevent disruption, downtime, and degradation or damage to equipment
<b>No additional overcurrent protection devices required in UL applications</b>	Reduces the number of components and costs required for protection
<b>Compact footprint</b>	Increases panel design flexibility
<b>Visual life indicator</b>	Quick visual determines module replacement status to avoid loss of protection
<b>Pluggable modules</b>	Fast and simple to replace, minimizing maintenance and downtime. No tools required
<b>Thermal protection</b>	Eliminates catastrophic failure
<b>IP20 protection rating</b>	Finger-safe design increases worker protection

## Solar Products

### LS7R0250 1500 V DC DISCONNECT SWITCH

1500 V Dc • 250 A

REACH ENEC CE IEC UL RoHS

### Description

The Littelfuse LS7R dc series is an energy-efficient, compact disconnect switch that quickly breaks or resumes the flow of current safely to prevent shock hazards when trying to isolate circuits or repair systems. It is a 1500 V dc disconnect for ungrounded systems.

### Features/Benefits

- The patented operation system minimizes damage caused by arcs upon disconnection to increase product reliability and longevity
- Streamline design eliminates the need for external bridging links (jumpers) to lower heat dissipation for increased energy efficiency, decreased installation and maintenance time, and reduced footprint for added design flexibility
- High-level disconnection insulation provides a barrier to stop conduction when switch is in off position for added safety
- The self-cleaning blade contacts eliminate performance degradation (from increased electrical resistance over time) to ensure consistent behavior across the product's lifespan
- The internally-located "sandwich-type" 2-contact symmetrical design mitigates the electromagnetic force of repulsion to offer enhanced functionality in short-circuit conditions
- Meets UL 94 flammability requirements with self-extinguishing/non-flammable materials to prevent fires

### Applications

- Solar/PV systems: combiner boxes, recombiner boxes and inverters
- Energy storage systems: disconnection of batteries, containerized batteries
- Oil & gas: dc drives
- Railway: earthing switches and battery disconnection
- UPS: switching and isolation of batteries
- Electrical vehicle chargers

### Specifications

#### UL 98B Standards

<b>Total Voltage Rating</b>	1500 V dc
<b>Amperage Rating</b>	250 A
<b>SCCR Rating</b>	10 kA

## Description

The Littelfuse LS6 dc series is an energy-efficient, compact disconnect switch that quickly breaks or resumes the flow of current safely to prevent shock hazards when trying to isolate circuits or repair systems.

## Features/Benefits

- Streamline design eliminates the need for external bridging links (jumpers) to lower heat dissipation for increased energy efficiency, decreased installation and maintenance time, and reduced footprint for added design flexibility
- High-level disconnection insulation provides a barrier to stop conduction when switch is in off position for added safety
- The self-cleaning blade contacts eliminate performance degradation (from increased electrical resistance over time) to ensure consistent behavior across the product's lifespan
- The internally-located "sandwich-type" 2-contact symmetrical design mitigates the electromagnetic force of repulsion to offer enhanced functionality in short-circuit conditions
- Meets UL 94 flammability requirements with self-extinguishing/non-flammable materials to prevent fires

## Applications

- Solar/PV systems: combiner boxes, recombiner boxes and inverters
- Energy storage systems: disconnection of batteries, containerized batteries
- Oil & gas: dc drives
- Railway: earthing switches and battery disconnection
- UPS: switching and isolation of batteries

## LM3030 SERIES CLASS J FUSE DISCONNECT SWITCH

30 A

REACH **RoHS** **CE** **UL** **US**

\*Handle and fuses sold separately

### Description

The Class J Fuse Disconnect Switch combines a switch and multiple fuses in a single, compact device. This switch, with both front or side operation, offers a simpler way to manually open and close a circuit while safeguarding against overcurrent and short circuits. When it detects an overload or short circuit, the fuse blows automatically to open or break the circuit both upstream and downstream and shuts off the equipment.

When installing or maintaining equipment, the Class J Fuse Disconnect Switch makes it easier to connect or disconnect the power in an isolated area. With a higher interrupting rating, it delivers more robust protection, increases personnel safety and offers a longer switch life.

### Features & Benefits

FEATURES	BENEFITS
<b>Fuse isolation</b>	Makes it easy to segregate a particular fuse on the circuit for safe repair or maintenance
<b>Double break contact system</b>	Breaks circuit upstream and downstream enabling the switch to handle higher voltages and provide a longer switch life
<b>Small footprint</b>	Saves space and provides design flexibility
<b>Optional handles (direct handle with push-to-detach system or external handle with shaft) with front or side operations</b>	Offer adaptability to system design. In addition, no tools are required for the frontal direct handle providing easy and quick installation
<b>Safe-to-touch transparent fuse covers</b>	Cannot be opened in the "ON" position for extra protection and provides visibility to fuses—without opening module—for added convenience
<b>Lockout-tagout</b>	When the device is in the "OFF" position, a padlock can be added to ensure equipment is properly shut off during maintenance or repair to prevent the release of hazardous energy
<b>Horizontal (standard), vertical and 45-degree mounting orientations</b>	Offer switch installation options to adapt to system design
<b>Test position on handle</b>	Permits control circuit auxiliary testing without switching the main contacts on for added safety

### Applications

- Industrial: service switchboards, distribution panels, control panels/motor control centers, compressors, drives, voltage stabilizers, UPS systems
- HVAC/R: air handling units, rooftop systems, compressors, chillers, refrigeration racks
- Mining: conveyor systems, main substations
- Solar: auxiliary services transformers
- Battery Energy Storage Systems: auxiliary services transformers

FEATURES	BENEFITS
<b>Fuse isolation</b>	Makes it easy to segregate a particular fuse on the circuit for safe repair or maintenance
<b>Double break contact system</b>	Breaks circuit upstream and downstream enabling the switch to handle higher voltages and provide a longer switch life
<b>Small footprint</b>	Saves space and provides design flexibility
<b>Optional handles (direct handle with push-to-detach system or external handle with shaft) with front or side operations</b>	Offer adaptability to system design. In addition, no tools are required for the frontal direct handle providing easy and quick installation
<b>Safe-to-touch transparent fuse covers</b>	Cannot be opened in the "ON" position for extra protection and provides visibility to fuses—without opening module—for added convenience
<b>Lockout-tagout</b>	When the device is in the "OFF" position, a padlock can be added to ensure equipment is properly shut off during maintenance or repair to prevent the release of hazardous energy
<b>Horizontal (standard), vertical and 45-degree mounting orientations</b>	Offer switch installation options to adapt to system design
<b>Test position on handle</b>	Permits control circuit auxiliary testing without switching the main contacts on for added safety

### Applications

- Industrial: service switchboards, distribution panels, control panels/motor control centers, compressors, drives, voltage stabilizers, UPS systems
- HVAC/R: air handling units, rooftop systems, compressors, chillers, refrigeration racks
- Mining: conveyor systems, main substations
- Solar: auxiliary services transformers
- Battery Energy Storage Systems: auxiliary services transformers

LM3100 SERIES CLASS J FUSE DISCONNECT SWITCH

Specifications

UL 98 Standards	
Voltage Rating	600 V Ac
Amperage Rating	100 A
SCCR Rating	200 kA
Ambient Temperature	-20 °C to 50 °C (-4 °F to 122 °F)
Insulation Voltage Rating Ui	1000 V Ac
Impulse Withstand Voltage Rating U <sub>imp</sub>	12 kV
Other Characteristics	
Three Phase Maximum HP Rating/Motor FLA Current	240 V ac: 30 HP/80 A 480 V ac: 60 HP/77 A 600 V ac: 75 HP/77 A
Fuse	Class J*
Fuse Size	29 x 117 mm (1.14 x 4.60")
Connection	Terminal
Maximum Width Terminal Busbar Connection Range	30 mm
Tightening Torque	159 lb-in
Flange Wire Range	AWG #3/0 - 300 kcmil (terminal lug required)
Base Mounting	Screws
Materials	Plastic housing, tin-plated copper terminals
Flammability Rating	UL 94 V-0
Applicable Standards	UL98 & UL 94 UL Guide WHTY UL Guide WHTY7 UL Listed E513470 CSA C22.2 NO 4 CE
Environmental	RoHS Compliant REACH
Country of Origin	Spain

\*Fuses sold separately.

Certification & Compliance

cULus	UL 98, Fourteenth Edition, E513470
CE	Declaration of Conformity (Main Device): EU_DOC-LM3_230731_0 (Accessories): EU_DOC-LM3_Accessories_230731_0
RoHS	RoHS 2 Directive 2011/65/EU; Directive (EU) 2015/863
REACH	REACH declaration: Regulation (EC) No 1907/2006

## LM3100 SERIES CLASS J FUSE DISCONNECT SWITCH

### Accessories

#### Frontal Direct Handle LDM3SI11

For open panel door access. Offers front operation. Features an easy push-to-detach system that requires no tools to attach or disassemble the handle.

#### Frontal External Handle with Shaft ON-OFF-TEST LDM3SA11

For closed panel door access. Includes the 'TEST' position to enable testing of the control circuit auxiliaries without switching the main contacts on to simplify maintenance and increase safety. Offers front operation only.

#### Lateral External Handle with Shaft ON-OFF-TEST LDM3SB11

For closed panel door access. Includes the 'TEST' position to enable testing of the control circuit auxiliaries without switching the main contacts on to simplify maintenance and increase safety. Offers side operation only.

#### Terminal Shrouds LDM3CU13

Protect against direct contact with the terminal.

#### Auxiliary Contact LDM3AUB1

Provides a signal to indicate the position of the switch.

#### Phase Barriers LDM3SF12

Isolates/separates active parts to increase clearance and decrease creepage.

#### Key Lock Device LDSCA11 (single)

Locks the operation of the switch with a key to prevent accidents and increase safety.

#### Key Lock Device LDSCE11 (double)

Locks the operation of the switch with a key to prevent accidents and increase safety.

#### Terminal Lugs LDM3TLU11 (1 pair)

Fastens the cable to a cage for stability.

### Description

The Class J Fuse Disconnect Switch combines a switch and multiple fuses in a single, compact device. This switch, with both front or side operation, offers a simpler way to manually open and close a circuit while safeguarding against overcurrent and short circuits. When it detects an overload or short circuit, the fuse blows automatically to open or break the circuit both upstream and downstream and shuts off the equipment.

When installing or maintaining equipment, the Class J Fuse Disconnect Switch makes it easier to connect or disconnect the power in an isolated area. With a higher interrupting rating, it delivers more robust protection, increases personnel safety and offers a longer switch life.

### Features & Benefits

FEATURES	BENEFITS
Fuse isolation	Makes it easy to segregate a particular fuse on the circuit for safe repair or maintenance
Double break contact system	Breaks circuit upstream and downstream enabling the switch to handle higher voltages and provide a longer switch life
Small footprint	Saves space and provides design flexibility
Optional handles (direct handle with push-to-detach system or external handle with shaft) with front or side operations	Offer adaptability to system design. In addition, no tools are required for the frontal direct handle providing easy and quick installation
Safe-to-touch transparent fuse covers	Cannot be opened in the "ON" position for extra protection and provides visibility to fuses—without opening module—for added convenience
Lockout-tagout	When the device is in the "OFF" position, a padlock can be added to ensure equipment is properly shut off during maintenance or repair to prevent the release of hazardous energy
Horizontal (standard), vertical and 45-degree mounting orientations	Offer switch installation options to adapt to system design
Test position on handle	Permits control circuit auxiliary testing without switching the main contacts on for added safety

### Applications

- Industrial: service switchboards, distribution panels, control panels/motor control centers, compressors, drives, voltage stabilizers, UPS systems
- HVAC/R: air handling units, rooftop systems, compressors, chillers, refrigeration racks
- Mining: conveyor systems, main substations
- Solar: auxiliary services transformers
- Battery Energy Storage Systems: auxiliary services transformers

## LM3200 SERIES CLASS J FUSE DISCONNECT SWITCH

### Accessories

**Direct Handle LDM3SI11**  
For open panel door access. Offers front operation. Features an easy push-to-detach system that requires no tools to attach or disassemble the handle.

**Frontal External Handle with Shaft ON-OFF-TEST LDM3SA11**  
For closed panel door access. Includes the 'TEST' position to enable testing of the control circuit auxiliaries without switching the main contacts on to simplify maintenance and increase safety. Offers front operation only.

**Lateral External Handle with Shaft ON-OFF-TEST LDM3SB11**  
For closed panel door access. Includes the 'TEST' position to enable testing of the control circuit auxiliaries without switching the main contacts on to simplify maintenance and increase safety. Offers side operation only.

**Terminal Shrouds LDM3CU13**  
Protect against direct contact with the terminal.

**Auxiliary Contact LDM3AUB1**  
Provides a signal to indicate the position of the switch.

**Phase Barriers LDM3SF12**  
Isolates/separates active parts to increase clearance and decrease creepage.

**Key Lock Device LDSCA11 (single)**  
Locks the operation of the switch with a key to prevent accidents and increase safety.

**Key Lock Device LDSCE11 (double)**  
Locks the operation of the switch with a key to prevent accidents and increase safety.

**Terminal Lugs LDM3TLU11 (1 pair)**  
Fastens the cable to a cage for stability.

## Protection Relays & Controls Catalog (PF130N)

The comprehensive line of electronic and microprocessor-based protection relays, timers, and flashers safeguard equipment and personnel to prevent expensive damage, downtime or injury due to electrical faults.

## Fuses & Fuse Holders Catalog (PF101N)

Littelfuse offers a complete circuit protection portfolio of industrial power fuses, including time-saving indication products for an instant visual blown-fuse identification.

## Surge Protection Devices Catalog (PF612)

These surge protection devices safeguard components from transient overvoltage or surges.
