81264-05

Description

Littelfuse's accessories protect both the physical integrity and the performance of our wide portfolio of toggle switches. For example, switch guard 82468 prevents damage to a toggle by covering the actuator, but also secures the switch and system in the Off (or On) position. In serving as a manual 'lock-out,' it prevents accidental actuation of the switch and system control is only allowed when the operator has deliberately raised the cover.
