Description
The Littelfuse CG4 Gas Discharge Tubes (GDT) series provides high levels of protection against fast rising transients caused by lightning disturbances. Offered in a miniature surface mount package, it has a surge rating of 3kA 8/20μs. Littelfuse CG4 mini GDTs are high voltage (800-3000V) components designed for surge protection and high isolation applications. It is also suitable for applications for which bias voltage or signal levels of several hundred volts are normally present. CG4 mini GDTs can be used in conjunction with Littelfuse MOVs (Metal Oxide Varistors) to provide superior protection performance for AC applications.

Features
- Voltage Ranges 800V to 3000V
- Excellent response to fast rising transients
- 3kA 8/20μs surge capability pulse as defined by IEC 61000-4-5, 2nd edition
- UL Recognized to UL 1449. CG41.2 is Recognized to both UL 1449 and CSA C22.2 No. 269.5.
- Offered in SMD package with square terminals
- Non-Radioactive
- Ultra Low capacitance (<0.8pF)
- RoHS compliant and Lead-free

Applications
- CATV equipment
- Antennas
- Air conditioning
- EV Power Station
- Inverters/Variable Frequency Drives (VFD)
- IEEE 803.2 compliant
- Ethernet interfaces
- Power Supplies
- Medical electronics
- Test Equipment
- Renewable Energy
## Product Characteristics

### Materials
- **Device Tin Plated 17.5 ± 12.5 Microns**
- **Construction: Ceramic Insulator**

### Storage and Operational Temperature
- -40 to +90°C

---

## Electrical Characteristics

### Device Specifications (at 25°C)
