Description
The MIDI® 498-IL Series 58V In-Line Fuse Holder can be installed directly in line with the cables to provide high-amperage main or branch circuit protection in harsh or hazardous environments. Because there’s no need to mount the fuse holder, it saves both time and space.

With a curved cover that helps prevent tube splitting, the MIDI® 498-IL Series fuse holder is specifically designed for use with heat shrink tubing (sold separately) in applications that need added splash protection.

This high-amp automotive fuse holder features a UL 94 V-0 rated glass-filled nylon base and cover and accepts M5 MIDI® bolt-down fuses rated up to 200 amps.

Specifications
Current Rating Continuous: 150A
Current Rating Max: 200A
Fuse Type: BF1 / MIDI M5 Fuses
Flammability Rating: UL 94 V-0
Mounting Method: Nuts and Bolts
Max Voltage Rating: 58V

Applications
• High-Amp Circuit Protection
• Automotive Circuit Protection

Features and Benefits
• Compatible with M5 MIDI® bolt-down fuses rated up to 200 amps (sold separately)
• Installs directly in line with cables, which eliminates the need to mount the fuse holder
• Curved cover helps prevent tube splitting when using heat shrink tubing (sold separately) to achieve added splash resistance
• Zinc-plated steel M5 bolts and M5 nylock nuts offer long-term corrosion resistance
• Available as a complete fuse holder assembly and as component parts to meet various installation requirements
