

Description

The MIDI® 498-IL Series 58V In-Line Fuse Holder can be installed directly in line with the cables to provide highamperage main or branch circuit protection in harsh or hazardous environments. Because there's no need to mount the fuse holder, it saves both time and space.

With a curved cover that helps prevent tube splitting, the MIDI® 498-IL Series fuse holder is specifically designed for use with heat shrink tubing (sold separately) in applications that need added splash protection.

This high-amp automotive fuse holder features a UL 94 V-0 rated glass-filled nylon base and cover and accepts M5 MIDI $^{\circ}$ bolt-down fuses rated up to 200 amps.

Specifications

Current Rating Continuous:	150A	
Current Rating Max:	200A	
Fuse Type:	BF1 / MIDI M5 Fuses	
Flammability Rating:	UL 94 V-0	
Mounting Method:	Nuts and Bolts	
Max Voltage Rating:	58V	

Applications

- High-Amp Circuit Protection
- Automotive Circuit Protection

Features and Benefits

- Compatible with M5 MIDI® bolt-down fuses rated up to 200 amps (sold separately)
- Installs directly in line with cables, which eliminates the need to mount the fuse holder
- Curved cover helps prevent tube splitting when using heat shrink tubing (sold separately) to achieve added splash resistance
- Zinc-plated steel M5 bolts and M5 nylock nuts offer longterm corrosion resistance
- Available as a complete fuse holder assembly and as component parts to meet various installation requirements
