GREYCON 7-POLE SOCKETS & PLUGS

00588000

00595900

Description

Menbers Greycon connectors are designed for the requirements and demands of mobile charging systems. Highly-durable, these connectors are meant for dependable, repeatable connections and disconnections in systems that demand many mate/unmate cycles. Supporting different cable cores, this family can adapt to the needs of your battery charging needs.

Features and Benefits

- Plugs are equipped with locking lever and rolers to prevent accidental disconnection.
- In a mated connection, the system is sealed to IP69K. Spring-loaded flip cover on socket ensures watertightness even when not mated.
- Plastic body and cover are impact and chemical resistant for harsh environments, guaranteeing an efficient and reliable electrical connection.
