### **End-Banded NTC Thermistor**

REACH RoHS

### Description

The NSLR series surface-mount, end-banded chip thermistors are designed for use on hybrid substrates, integrated circuits, and printed circuit boards. They have a solder-coated metallization that is suitable for various contact techniques including wire bond, epoxy, or solder. Since these thermistors are manufactured using the most advanced equipment and technology available, their dimensional parameters are extremely uniform making them especially suitable for use with automatic handling and placement equipment. The NSLR series offers a highly reliable structure and exceptional accuracy. Options include non-standard resistance values and tolerances as well as tape and reel packaging. These thermistors are used in a variety of industrial applications.

### **Features**

- Surface-mountable
- Wide resistance range
- Highly reliable structure
- EIA size: 1206
- Rated to 125 °C operating temperature
- Small size
- Nickel barrier
- Extremely accurate values

#### **Benefits**

- Efficient
- Cost-effective
- Small components/small footprint
- Simpler and faster operation for automated assembly
- Improved mechanical performance
- Design flexibility

### **Applications**

- Battery packs
- Automotive electronics
- Mobile communication devices
- Consumer electronics
- Household electronics
- Medical equipment
- Industrial electronics and automation
