Description
The 455 series is a three-phase, dual-range voltage monitor that combines load and line side monitoring for a complete protection solution. Load side monitoring alerts the user to contactor failure or impending contactor failure. Line side monitoring protects the motor from damaging fault conditions that may be present prior to the motor starting. This is unique because with other line/load side monitors, the motor must be started before a voltage fault is detected. With the 455 series, the motor is fully protected at all times.

This voltage monitor protects 190–480 V ac, 50*/60 Hz motors regardless of their size. It automatically selects between the 200 V and 400 V range when the user selects the nominal voltage setpoint. Other adjustments include a 2–30 second trip delay, a 2–300 second restart delay (and manual restart), and a voltage unbalance trip point of 2–8%. The voltage monitor’s circuitry is powered through the line side connections so there is no need for separate control power, making it easy to install.

Equipped with an infrared LED, the 455 series can communicate with the optional hand-held diagnostic tool, Informer-MS, to obtain valuable information such as real-time voltage, voltage unbalance on both line and load sides, motor run hours, last 20 faults, last 32 motor starts, high- and low-voltage trip points, voltage unbalance trip point, restart and trip delay settings, LED status, and more.

*Note: 50 Hz will increase all delay times by 20%.

Features & Benefits

Applications
- Oil rigs
- Compressors and fan motors
- HVAC
- Heat, well, and sump pumps
- Small conveyer motors
Specifications

Input Characteristics

Frequency 50*/60 Hz

Functional Characteristics

Trip Delay Time

- Low & High Voltage and Unbalance: 2–30 seconds adjustable
- Single-phasing Faults (>25% UB): 2 seconds fixed

Restart Delay Time

- After a Fault: Manual, 2–300 seconds adjustable
- After a Complete Power Loss: Manual, 2–300 seconds adjustable
- After a Motor Shut-down: Manual, 2–300 seconds adjustable

Output Characteristics

Output Contact Rating (SPDT)

- Pilot Duty: 480 VA @ 240 V ac
- General Purpose: 10 A

High Voltage Relay (-480R)

- Pilot Duty: 470 VA @ 600 V ac

General Characteristics

Ambient Temperature Range

- Operating: -40° to 70 °C (-40° to 158 °F)
- Storage: -40° to 80 °C (-40° to 176 °F)

Repeat Accuracy Fixed Conditions ±0.1%

Maximum Input Power 6 W

Terminal Torque 7 in.-lbs.

Wire Size 12–18 AWG

Transient Protection (Internal) IEC 61000-4-5;1995 ±6 kV

Dimensions

| H | 74.4 mm (2.93”; 2.9”) |
| W | 133.9 mm (5.27”; 5.27”) |
| D | 74.9 mm (2.95”) |

Weight 1.1 lbs. (17.6 oz., 498.95 g)

Mounting Method #8 screws

*Note: 50 Hz will increase all delay times by 20%.

Certification & Compliance

UL 508 (File #E68520)

CSA C22.2 No. 14 (File #46510)

CE IEC 60947-6-2

Accessories

Informer-MS
A hand-held diagnostic tool designed for use with Littelfuse 455 equipped with an infrared LED transmitter

Informer IR Kit-36
36” infrared adapter cable attaches to the face of the unit to provide remote diagnostics without opening the panel.
