## AEC-Q200 Qualified > Ceramic Fuse

### Description

The 440A Series AEC-Qualified fuses are specifically tested to cater to secondary circuit protection needs of compact auto electronics applications.

The general design ensures excellent temperature stability and performance reliability. This high I2t fuse series is designed to have ultra high inrush current withstand capability to avoid nuisance fuse open.

### Features & Benefits

- Operating Temperature from -55°C to +150°C
- 100% Lead-free, RoHS compliant and Halogen-free
- AEC-Q200 Qualified
- Ultra high I2t values
- Fast response to faulty current to ensure over-current protection to sensitive electronic component
- Recognized to UL/CSA/NMX 248-1 and UL/CSA/NMX 248-14

### Applications

- Li-ion Battery
- LED Lighting
- Automotive Navigation System
- TFT Display
- Battery Management System (BMS)
- Cluster

#### Notes:

- AC Interrupting Rating tested at rated voltage with unity power factor. DC Interrupting Rating tested at rated voltage with time constant < 0.8 msec.
- Nominal Resistance measured with < 10% rated current.
- Nominal Melting I<sup>2</sup>t measured at 1msec. opening time.
- Nominal Voltage Drop measured at rated current after temperature has stabilized.

Devices designed to carry rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Derating Curve" for additional derating information.

Devices designed to be mounted with marking code facing up.

Temperature Derating Curve

**Note:**  
 1. Derating depicted in this curve is in addition to the standard derating of 20% for continuous operation.

**Example:**  
 For continuous operation at 75 degrees celsius, the fuse should be derated as follows:  
 $I = (0.80)(0.85)_{RAT} = (0.68)_{RAT}$
