

zeptoSMDC Series

Surface Mount

Description

Littelfuse zeptoSMDC Series PPTC is developed for overcurrent and overtemperature protection in mobile applications. It works to protect battery management ICs and fuel augers.

Features

- Maximum electrical rating: 13 VDC
- Short circuit current: 82~200mA
- Small footprint 0201 size
- RoHS compliant
- ISO/TS 16949 certified
- Resets to normal operation after fault is cleared
- Help protect battery monitor IC from electrical over-stress
- Save space due to small footprint

Web Resources

Download ECAD models, order samples, and find technical resources at www.littelfuse.com

Agency Approvals

Agency	Agency File Number
	E74889
	50517757

Applications

- Smartphones and Tablets
- Notebook PC
- e-Readers
- Portable medical equipment
- Mobile point of sale
- Wearables
- Smartwatches
- Wireless speakers
- Portable game players

Electrical Characteristics

Part Number	Initial Resistance Ohms @ 25°C		V_{MAX}^2 (Vdc)	I_{MAX}^3 (mA)	Trip Temperature °CTYP	Hold Current ⁴ (mA) @ 25°C	Time to Trip ⁵		Post Process Resistance ⁶	
	Min ¹	Max					Current (mA)	Time (ms) Max	ohms @ -20°C Min	ohms @ 60°C Max
zeptoSMDC0011F	10	80	13	82	125	11	80	20	68	290
zeptoSMDC0015F	10	60	13	200	125	15	80	20	28	150

Notes:

1. Rmin = Minimum resistance of device in initial (un-soldered) state
2. Vmax = Maximum voltage device can withstand without damage at rated current (Imax)
3. Imax = Maximum fault current device can withstand without damage at rated voltage (Vmax)
4. Ihold = Hold current: maximum current device will pass without tripping in 25°C still air. Values specified using PCB's with 0.004" x 1.0 ounce copper traces
5. Time to trip values specified using PCB's with 0.004" x 1.0 ounce copper traces
6. With LOCTITE ECCOBOND UF 3915, curing condition: 140°C/20mins, resistance is measured 12 hours post coating curing process

Soldering Parameters

Profile Feature		Pb-Free Assembly
Average Ramp-Up Rate (Liquidus Temp (TL) to peak)		1~3 °C/second max.
Preheat:	Temperature Min. (Ts_{min})	130 °C
	Temperature Max. (Ts_{max})	180 °C
	Time Min. to Max (ts)	90 – 110 seconds
Ts_{max} to TL Ramp-up Rate		≤2 °C/seconds max.
Reflow	Temperature (TL) (Liquidus)	217 °C
	Time (tL)	60~70 seconds
Peak Temperature (Tp)		240 °C
Time within 3°C of actual Peak Temperature (tp)		35 seconds
Ramp-down Rate		2~4 °C/seconds
Time 25°C to peak Temperature (Tp)		300 seconds max.

- All temperature refer to topside of the package, measured on the package body surface.
- If reflow temperature exceeds the recommended profile, devices may not meet the performance requirements.
- Recommended reflow methods: IR, vapor phase oven, hot air oven.
- Customer should validate that the solder paste amount and reflow recommendations to meet its application
- Recommended maximum paste thickness is 0.25 mm (0.010 inch).
- Devices can be cleaned using standard industry methods and aqueous solvents.
- Devices can be reworked using the standard industry practices (avoid contact to the device).

Physical Specifications

Terminal Material	Solder-Plated Copper (Solder Material: NiAu)
Lead Solderability	Meets EIA Specification RS186-9E, ANSI/J-STD-002B, Test S

Environmental Specifications

Operating Temperature	-20°C to 60°C
Passive Aging	+85°C, 1000 hours -25% typical resistance change
Humidity Aging	+65°C, 90%, R.H., 100 hours -/+15% typical resistance change
Thermal Shock	MIL-STD-202, Method 107G -33% typical resistance change -40°C to 85°C (20 times)
Vibration	MIL-STD-202, Method 204 Condition A No change
Moisture Sensitivity Level	Level 2a, J-STD-020

Warning

- Electrical performance of the device can differ according to installation conditions. Users should independently evaluate the suitability of the device under the actual application conditions.
- Operation beyond maximum ratings may result in device damage.
- Exposure to silicon-based oils, solvents, electrolytes, acids, or similar materials can adversely affect device performance.
- The device undergoes thermal expansion during fault conditions. It should be provided with adequate space to allow expansion and should be protected against mechanical stress.
- Consult with Littelfuse if the device will experience thermal process other than reflow onto PCB board, such as molding or hand soldering.
