MINI® ADD-A-CIRCUIT® SERIES
FUSE HOLDER FOR MINI®, LOW PROFILE MINI®, OR MICRO2® FUSES

Description
The MINI® Add-A-Circuit Series Fuse Holder for MINI®, Low Profile MINI®, or MICRO2® Fuses is designed to allow easy installation of additional circuits without any cutting or splicing, which is typically necessary to prevent voiding a new vehicle warranty. The fuse tap turns a single fuse slot into two slots so you can protect the new accessory circuit as well as the existing circuit.

The MINI® Add-A-Circuit fuse tap is available for MINI®, Low Profile MINI®, and MICRO2® fuses. Available blister packaged MINI® Add-A-Circuit kits come with a set of fuses (3A, 5A, 7.5A, and 10A) in the corresponding MINI®, Low Profile MINI®, or MICRO2® fuse style.

Applications
- Add-On Accessory Circuits

Specifications
- Current Rating Continuous: 7.5 Amps
- Current Rating Max: 10 Amps
- Current Rating Max Terminal: 10 Amps
- Fuse Type: Low Profile MINI / MICRO2 Fuse / MINI
- Flammability Rating: UL 94 V-0
- Input Terminals: Butt Splice Connectors In Line
- Mounting Method: In-Line Fuse Holder Blades / Butt Splice Connector
- Output Terminals: Fuse Holder Blades
- Max Voltage Rating: 32 VDC / 58 VDC
- Wire Description: 125°C rated, UL-3266 (GPT) RED Wire, Stranded Copper UL 1015 Red Wire Withstand 105°C GXL Red Wire Withstand125°C
- Wire Size: 16 AWG

Features and Benefits
- Available for MINI®, Low Profile MINI®, and MICRO2® fuses
- Turns one fuse slot into two to protect an additional accessory circuit without cutting or splicing
- Available butt splice connectors allow easy wiring
- 16 AWG wire leads with red insulation
- UL 94 V-0 flammability rating
