Description

Littelfuse 408 Series is a 100% lead-free, RoHS compliant, and halogen-free fuse designed specifically to provide overcurrent protection to circuits that operate under high working ambient temperatures up to 150 °C and high in-rush currents. The general design ensures excellent temperature stability and performance reliability. This high I²t time lag fuse is designed to have ultra-high in-rush current withstand capability to avoid nuisance fuse open.

Features

- Operating Temperature from -55 °C to +150 °C
- UL Recognized to UL / CSA / NMX 248-1 and UL / CSA / NMX 248-14
- 100% Lead-free, RoHS compliant, and Halogen-free
- Suitable for both leaded and lead-free reflow / wave soldering
- Ultra-high I²t values

Benefits

- Avoids nuisance opening due to high inrush and surge current inherent in the system
- High current ratings in small size

Application

- Displays
- Servers
- Computers
- Printers
- Scanners
- Data Modems
- Gaming Consoles

Notes:

1. Nominal Resistance measured with < 10% rated current.
2. Nominal Melting I²t measured at 1 msec opening time.
3. Nominal Voltage Drop measured at rated current after temperature has stabilized.

- Devices designed to carry rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See Temperature Re-rating Curve for additional derating information.
- Devices designed to be mounted with marking code facing up.

Temperature Re-rating Curve

Note:
Re-rating depicted in this curve is in addition to the standard re-rating of 20% for continuous operation.

Example:
For continuous operation at 75 °C, the fuse should be rerated as follows: $I = (0.80) (0.85) I_{\text{RAT}} = (0.68) I_{\text{RAT}}$
