Motor and Pump Protection Relays
777-KW/HP-P2 Series

3-Phase Current & Voltage Monitor

Description
The 777-KW/HP-P2 is a 3-phase current and voltage monitor that provides unsurpassed protection by combining overload, voltage, phase loss and reversal, voltage and current unbalance, power monitoring*, and underload trip based on power into one efficient unit. The underpower trip feature is desirable anytime the current vs. load characteristic is non-linear or has little change. In general terms, smaller motors and slow-speed motors have little change in current over the normal load range. Larger motors that are running light loads will also show small current changes over the operating load range. The low and high power protection feature increases reliability for non-linear motors where the load characteristic has little change.

For standalone applications, these units incorporate a 3-digit LED display that is used for programming, providing real-time operational information, and displaying diagnostic codes to aid in troubleshooting a fault condition. These units also feature a communications network port that can be used with communication modules, listed in the 777 accessories section, to form a Modbus, DeviceNet**, Profibus, or Ethernet network. Up to 99 units can be remotely monitored and controlled from a PC, PLC, or SCADA system, and data logging through a PC with the optional Solutions software.

*Low current trip and high power trip are network programmable only.
**DeviceNet is a trademark of its respective owner.

Features & Benefits

<table>
<thead>
<tr>
<th>FEATURES</th>
<th>BENEFITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Built-in display</td>
<td>Visual indication for programming, viewing real-time voltage, current, kilowatts, horsepower, and last fault code</td>
</tr>
<tr>
<td>Programmable voltage and current settings</td>
<td>Allows usage on wide range of systems</td>
</tr>
<tr>
<td>3 selectable restart options</td>
<td>Choose from automatic, semi-automatic, or manual to best meet individual application needs</td>
</tr>
<tr>
<td>3 programmable restart delay timers</td>
<td>Program separate restart delay time for rapid cycle protection, motor cool down, and dry-well recovery</td>
</tr>
<tr>
<td>Remote display compatibility</td>
<td>Increases safety through remote display of real-time data and fault history without the need to open the cabinet. Aids with arc flash safety regulations.</td>
</tr>
<tr>
<td>Flexible reset</td>
<td>Reset can be done through a push button on the relay or remotely with optional 777-MRSW or OL-Reset remote reset kit</td>
</tr>

Applications
- Conveyor systems
- HVAC equipment
- Saws and grinders
- Fan motors
Motor and Pump Protection Relays
777-KW/HP-P2 Series

Specifications

Frequency
50/60Hz

Functional Characteristics
TC-Overcurrent Trip Class
02-60, J02-J60, L00-L60 or OFF

Output Characteristics
Output Contact Rating (SPDT - Form C):
Pilot duty rating 480VA @ 240VAC, B300
General purpose 10A @ 240VAC
Pilot duty rating for HVR model 470VA @ 600VAC, B600

General Characteristics
Ambient Temperature Range:
Operating -20° to 70°C (-4° to 158°F)
Storage -40° to 80°C (-40° to 176°F)

Accuracy:
Voltage ±1%
Current ±3% (<100 amps direct)
Power ±4% (<100 amps direct)
GF Current ±15%
Timing ±0.5 second

Repeatability:
Voltage ±0.5% of nominal voltage
Current ±1% (<100 amps direct)
Power ±2%
Maximum Input Power 10 W

Pollution Degree 3
Class of Protection IP20
Relative Humidity 10-95%, non-condensing per IEC 68-2-3

Terminal Torque 7 in.-lbs.

Standards Passed
Electrostatic Discharge (ESD) IEC 61000-4-2, Level 3, 6kV contact, 8kV air
Radio Frequency Immunity (RFI), Conducted IEC 61000-4-6, Level 3 10V/m
Radio Frequency Immunity (RFI), Radiated IEC 61000-4-3, Level 3 10V/m
Fast Transient Burst IEC 61000-4-4, Level 3, 3.5 kV input power

Surge
IEC 61000-4-5, Level 3, 2kV line-to-line; Level 4, 4kV line-to-ground
ANSI/IEEE C62.41 Surge and Ring Wave Compliance to a level of 6kV line-to-line
Hi-potential Test Meets UL508 (2 x rated V +1000V for 1 minute)
Vibration IEC 68-2-6, 10-55Hz, 1mm peak-to-peak, 2 hours, 3 axis
Shock IEC 68-2-27, 30g, 3 axis, 11ms duration, half-sine pulse
Maximum Conductor Size (with insulation) through 777 0.65”

Dimensions
H 77.47 mm (3.05”); W 97.79 mm (3.85”); D 128.27 mm (5.05”)

Weight
1.56 lbs. (24.96 oz., 707.6 g)

Mounting Method
Surface mount (4 - #8 screws) or DIN rail mount

Certification & Compliance

UL UL508, UL1053 (File #E68520)

CE IEC 60947-1, IEC 60947-5-1

CSA C22.2
Motor and Pump Protection Relays
777-KW/HP-P2 Series

Ordering Information

<table>
<thead>
<tr>
<th>MODEL</th>

</tr>
<tr>
<td>777-HVR-KW/HP-P2</td>
<td>340-480VAC</td>
<td>2-800A (external CTs required above 90A)</td>
<td>Provides 470VA @ 600VAC output SPOT relay contacts. Required when a CPT (control power transformer) is not used on a 480V system. Commonly used in pumping applications to save the cost and extra wiring associated with a CPT</td>
</tr>
<tr>
<td>777-575-KW/HP-P2</td>
<td>500-600VAC</td>
<td>2-800A (external CTs required above 90A)</td>
<td>Provides 480VA @ 240VAC output SPOT relay contacts. Used in Canada and NE USA where 575V utility power services are common</td>
</tr>
<tr>
<td>777-MLR-KW/HP-P2</td>
<td>200-480VAC (3-phase)</td>
<td>0.5-21A and 40-740A with external CTs</td>
<td>Provides 480VA @ 240VAC output SPOT relay contacts. It is wired directly without the need to loop conductors for 5-21 amps (under 5 amps requires looping of conductors), and can be used with external CTs for 40-740 amps</td>
</tr>

Accessories

RS485MS-2W Communication Module
(for limited Modbus capabilities) Required to enable the Modbus communications function on Model 77X-type products.

CIO-MB/CIO-120-MB Communication Module
Modbus-RTU interfaces capable of providing discrete control and monitoring of an overload relay over a Modbus network.

CIO-DN-P/CIO-120-DN-P Communication Module
DeviceNet™ interfaces capable of providing discrete control and monitoring of motor starters, drives and other devices over a DeviceNet™ network.

CIO-777-PR Communication Module
Profibus interface capable of providing discrete control and monitoring of motor starters, drives and other devices over a Profibus network.

CIO-EN (non-POE) Communication Module
Modbus-TCP and Modbus-RTU interface capable of providing discrete control and monitoring of an overload relay over a Modbus network.

Communication Adapters
- RS485-RS232–Converter with cable & plug
- RS485-USB–Converter with cable & plug
- RS232-USB–Converter
Specifications match industry standard.

RM1000 Remote Monitor
The RM1000/777 motor management system combines unsurpassed electronic motor protection and critical, user-friendly, motor monitoring for up to 16 devices.

RM2000 Remote Monitor
The RM2000/777 motor management system combines unsurpassed electronic motor protection and critical, user-friendly, motor monitoring with event storage and real-time clock for date and time stamp.

Solutions Software: Solutions-M
Software features include data logging, real-time data monitoring and fault and event monitoring.

777-MRSW Manual Remote Reset Kit
Allows the 777 line of MotorSaver® and PumpSaver® products to be manually reset without opening the panel door.

OL-Reset Manual Remote Reset Kit
Allows the 777 line of MotorSaver® and PumpSaver® products to be manually reset without opening the panel door.

Current Transformer Wiring Diagram for 777-KW/HP-P2 Series

Littelfuse recommends using CTs with terminals to simplify installation.

All CTs must face the same direction, and all CT secondaries must be wired identically, i.e. all X1 terminals enter the main (round) window and return to H1 terminal after exiting the loop conductor window (rectangle). Every CT secondary must make 5 passes through the corresponding main conductor window.
