## 60V DC MAX Contactor Relays

DCNLM50

DCNLM200

DCNLM100

### Description

The DCNLM Series 48V High-Current DC Contactor Relay is available with up to 400A contact switching capability as well as multiple coil voltage options to suit a wide variety of stationary applications, including use in electrical control systems for communication power supplies, industrial machines, and uninterruptible power supplies (UPS).

The DCNLM normally open, high-current DC contactor features 48V non-polarized main contacts and is available in single-coil and double-coil configurations.

### Specifications

<b>Max Voltage Rating (V DC):</b>	60
<b>Current Rating Continuous (A):</b>	50, 100, 200, 400
<b>Coil Voltage Rating (V DC):</b>	12, 24, 48, 60
<b>Ingress Protection:</b>	IP 40
<b>Operating Temperature (°C):</b>	-40°C to +70°C
<b>Approvals:</b>	400A have CCC and are UL Recognized UL File No. E47258

### Applications

- Communication Power Supplies
- UPS

### Features and Benefits

- Available with up to 400A contact switching capability
- Main contacts are rated for 48V (typical) and 60V (max)
- Coil voltage options include 12V, 24V, 48V, and 60V
- Available in single-coil and double-coil configurations
- Normally open, monostable relay design
- Non-polarized main contacts

## 60V DC MAX Contactor Relays

### Application Notes & Definitions

- Be sure to use a washer to prevent screws from loosening. Tighten the screw so that the torque is in the range specified below. Exceeding the maximum torque can lead to product rupture. See chart below.
- Please refer to the drawing for connection polarity.
- Do not use dropped products.
- Avoid installing the product in a strong magnetic field (Close to the transformer or magnet), or near an object with heat radiation.
- Electrical life  
Please use under load capability and life cycle so as not to cause a function failure. (Please also treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure happens. So it is necessary to take layout into account to make sure power shall be cut off within 1 second.
- Do not let particle and oil stain on the main terminal with which the load shall make a reliable contact or it will cause a lot of heat.
