Description

The LTX Power Distribution Module is a high current sealed primary fuse box that can be placed in the battery box, or near the battery box to fuse major feeder cables. The unit features bussed input to all 4 MEGA® and 2 MIDI® fuses.

Features and Benefits

- Put all the high current fusing in one sealed location
- Common input reduces the number of large gage cables that need to attach to battery
- All bolt down connections are made inside of the seals which enhances the environmental protection of the box
- Gore-Tex breather prevents temperature changes from pulling in moisture
- Broad range of values for MEGA® and MIDI® fuses allow for use in a variety of applications
