SR SERIES MASTER DISCONNECT SWITCHES

300A • Isolates High-Current DC Circuits From Battery Sources

Features and Benefits
• Isolates the batteries and eliminates battery drain when vehicle is stored overnight or for longer periods. Electrically cuts off battery power for safety or when the vehicle is being serviced.
• Ignition protected to SAE J1171 and ISO 8846 for installation in a battery box or on vehicles carrying hazardous loads.
• Available with integral holes to accept lockout/tagout. No need to purchase additional hardware.
• Plastic construction will not corrode and stands up to roadsplash and salt spray. Ingress protected to IP67/IP69K. Switch can be mounted anywhere on the vehicle.
• Units have a depth of only 3” (knob front to end of studs) – can be installed in locations where behind-panel space is limited.
• Stainless steel hardware and tin-plated copper contacts minimize resistance in harsh environments.

Description
Stainless steel hardware and tin-plated copper studs. Can be installed in locations with limited space behind the panel.

Specifications Overview
Max Operating Voltage: 32V DC & 12V DC
Single Cycle: 48V DC
Max Continuous Current: 5A-600A
Inrush Rating (2 sec): 3,500A
Terminal Stud Size: 3/8”-16 (accepts M10 terminals)
Ingress Protection: IP67/IP69K
Ignition Protection: Meets ISO 8846 & SAE J1171

Specifications

Master Battery Disconnect (shown in ON state)
