

PICO® 305 Series Fuses

Enhanced Protection for Hazardous Locations

Prevent Ignition in Hazardous Environments

- Prevents heat and sparks from being exposed to potentially explosive gases and dust
- Eliminates the need for costly extra processes to meet UL 913 standard
- Simplifies design and test of intrinsically safe electrical equipment

Ideal For Use in a Wide Range of Processing Industries

Oil

Chemical

Mining

Pharmaceutical

Gas

Food & Beverage

PICO® 305 Series Fuse Features

- Well suited for 277V applications with 1500A breaking capacity
- Sealed and encapsulated (1mm minimum)
- Intrinsically safe fuses are typically designed into mobile devices

Intrinsically safe apparatus demand intrinsically safe fuses
