

ITV4030 12A/15A Series

Description

ITV4030 Series is a three terminals surface mountable battery protector which is designed to against both overcurrent and overvoltage (overcharging). A fuse element is embedded to cut off the circuit when overcurrent issue happens. A heater is also directly embedded under the fuse element, it will generate heat to blow the fuse once overvoltage detected by IC or FET.

Agency Approvals

Agency	Agency File Number	Ampere Range
	E10480	12 A, 15 A
	TA 50461285	12 A, 15 A

Features

- Halogen Free
- Surface Mount
- Fast response
- Protection for both overcurrent and overcharging

Thermal Derating Characteristics

Ambient Operating Temperature		25° C	40° C	60° C
Recommend Rated Current (A)	ITV4030 12A Series	13.5	12.0	10.0
	ITV4030 15A Series	18.0	16.0	13.5

Applications

- Two-way radio
- eCall
- Tablet PC
- Vacuum cleaner
- Power tools

Electrical Characteristics

Part Number	Ordering Code	I _{rated} (A)	Cell in Series	V _{max} (Vdc)	I _{break} (A)	V _{OP} (V)	Resistance		Agency Approvals		
							R _{heater} (Ω)	R _{fuse} (mΩ)			
ITV4030L0412	ITV4030L0412NR	12	1	36	50	3.0 ~ 4.5	0.6 ~ 1.5	1.5 ~ 3.5	X	X

ITV4030L2015	ITV4030L2015NR	15	5	36	50	14.4 ~ 23.5	17.9 ~ 29.1	1.0 ~ 3.0	X	X	
Current Capacity		100% x I _{rated} , No Melting									
Cut Time		200% x I _{rated} < 1 min									
Interrupting Current		5 x I _{rated} , power on 5 ms, power off 995 ms, 10000 cycles, No Melting									
Over Voltage Operation		In operation voltage range, the fusing time is <1min									

Notes:

I_{rated} = Current carrying capacity that is measured at 40°C thermal equilibrium condition

I_{break} = The current that the fuse element is able to interrupt

V_{max} = The maximum voltage that can be cut off by fuse

V_{OP} = Range of operation voltage

R_{heater} = The resistance of the heating element

R_{fuse} = The resistance of the fuse element

Cells in series = Number of battery cells connected in series in the circuit for ITV device to protect.

- Value specified is determined by using the PWB with 2mm*2oz copper traces, AWG18 covered wire, and 0.6mm glass epoxy PCB.
- Specifications are subject to change without notice.

Cut Time by Heater Operation (ITV4030 12A series)

Various heater wattage at 25°C ambient temperature

Constant heater wattage at various ambient temperature

Cut Time by Heater Operation (ITV4030 15A series)

Various heater wattage at 25°C ambient temperature

Constant heater wattage at various ambient temperature

Cut Time by Current Operation (ITV4030 12A series)

Various interrupting current at 25°C ambient temperature

Constant 2x rated current at various ambient temperature

Cut Time by Current Operation (ITV4030 15A series)

Various interrupting current at 25°C ambient temperature

Constant 2x rated current at various ambient temperature

Environmental Specifications

Storage Temperature	0~35°C, ≤70%RH 3 months after shipment
Operating Temperature	-10°C to +65°C
Hot Passive Aging	100±5°C, 250 hours No structural damage and functional failure
Humidity Aging	60°C±2°C, 90~95% R.H. 250 hours No structural damage and functional failure
Cold Passive Aging	-20±3°C, 500 hours No structural damage and functional failure
Thermal Shock	MIL-STD-202 Method 107G +125°C/-55°C, 100 times No structural damage and functional failure

Device Circuit

Physical Dimension (mm)

Board and Solder Layout Recommend (mm)

Symbol	Dimension
A1	1.20 ± 0.1
A2	1.55 ± 0.1
A3	2.40 ± 0.1
B1	1.20 ± 0.1
B2	1.60 ± 0.1
B3	1.55 ± 0.1
B4	0.90 ± 0.1
B5	1.55 ± 0.1

Soldering Parameters

Average Ramp-Up Rate ($T_{s_{max}}$ to TP)		3°C/second max.
Preheat	Temperature Min ($T_{s_{min}}$)	150°C
	Temperature Max ($T_{s_{max}}$)	200°C
	Time ($T_{s_{min}}$ to $T_{s_{max}}$)	60-120 seconds
Time maintained above:	Temperature (T_L)	217°C
	Time (t_L)	60-105 seconds
Peak Temperature (T_p)		255°C
Time within 5°C of actual Peak Temperature (t_p)		5 seconds max.
Ramp-Down Rate		6°C/second max.
Time 25°C to Peak Temperature		8 minutes max.

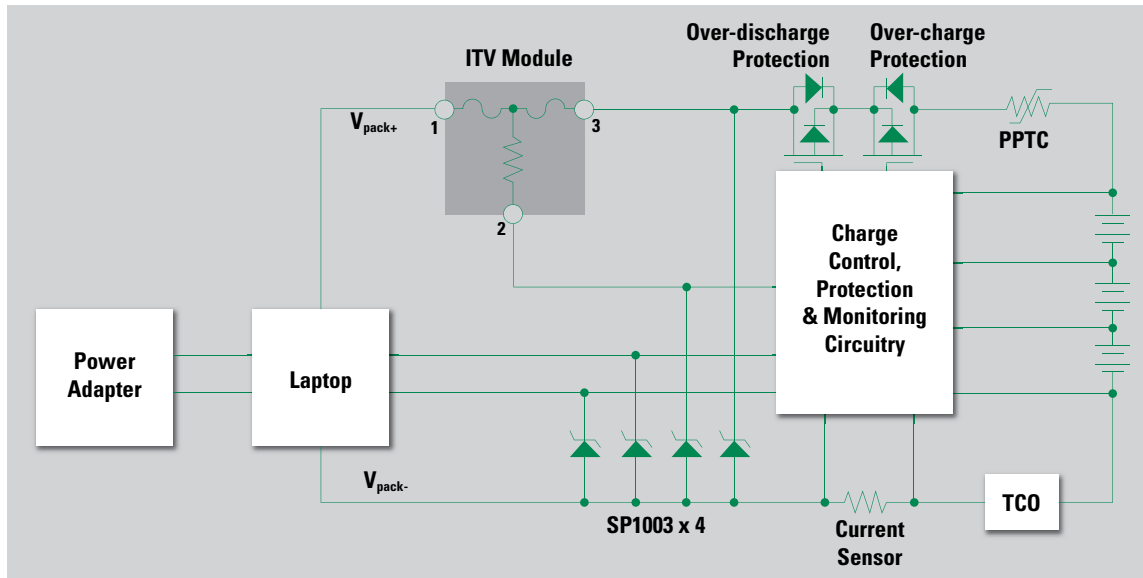

Physical Specifications

Material	Glass Epoxy PCB
Base Thickness	0.6mm
Copper Thickness	0.07mm
Covered Wire	AWG18

-- All temperature refer to topside of the package, measured on the package body surface
 -- If reflow temperature exceeds the recommended profile, devices may not meet the performance requirements

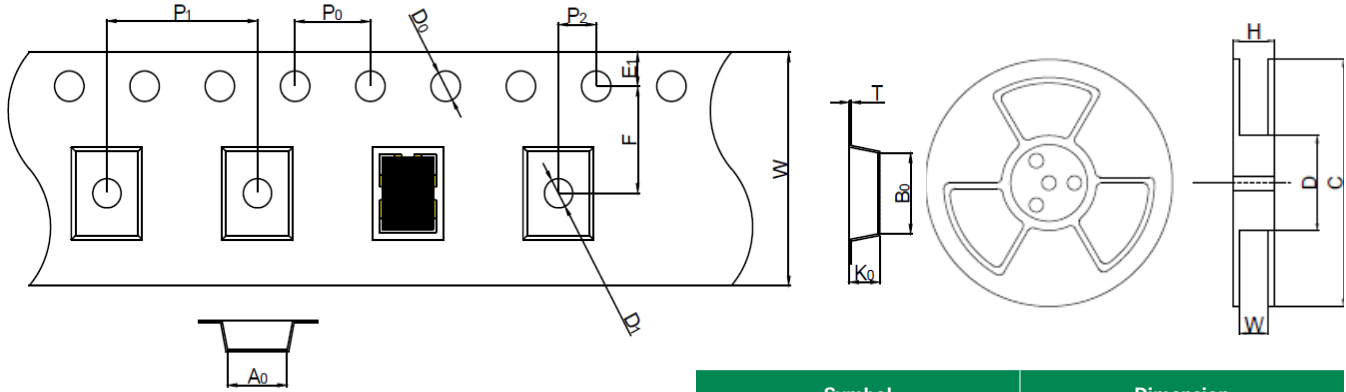

Typical Application Circuit Diagram

Installation and Handling Guidelines

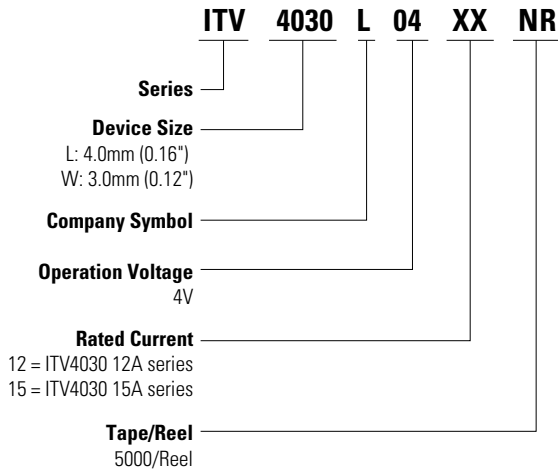

- Before and after mounted, the ultrasonic-cleaning or immersion-cleaning must not be done to ITV device. The flux on element would flow, and it would not be satisfied its specification when cleaning is done. In addition, a similar influence happens when the product comes in contact with cleaning solution. These products after cleaning will not be guaranteed.
- Silicone-based oils, oils, solvents, gels, electrolytes, fuels, acids, and similar will adversely affect the properties of ITV devices, and shall not be used or applied.
- Please DO NOT reuse the ITV device removed by the soldering process.
- ITV devices are secondary protection devices and are used solely for sporadic, accidental overcurrent or overtemperature error condition, and shall NOT be used if or when constant or repeated fault conditions (such fault conditions may be caused by, among others, incorrect pin-connection of a connector) or over-extensive trip events may occur.
- Operation over the maximum rating or other forms of improper use may cause failure, arcing, flame and/or other damage to the ITV devices.
- The performance of ITV devices will be adversely affected if they are improperly used under electronic, thermal and/or mechanical procedures and/or conditions non-conformant to those recommended by manufacturer.
- Customers shall be responsible for determining whether it is necessary to have back-up, failsafe and/or fool-proof protection to avoid or minimize damage that may result from extra-ordinary, irregular function or failure of ITV devices.
- There should be minimum of 0.1mm spacing between ITV and surrounding compounds, to maintain the product characteristics and avoid damage other surrounding compounds.
- This product is designed and manufactured only for general-use of electronics devices. We do not recommend that it is used for the applications military, medical and so on which may cause direct damages on life, bodies or properties.
