The SP3001 has ultra low capacitance rail-to-rail diodes with an additional zener diode fabricated in a proprietary silicon avalanche technology to protect each I/O pin providing a high level of protection for electronic equipment that may experience destructive electrostatic discharges (ESD). These robust diodes can safely absorb repetitive ESD strikes at the maximum level specified in the IEC 61000-4-2 international standard (Level 4, ±8kV contact discharge) without performance degradation. Their very low loading capacitance also makes them ideal for protecting high speed signal pins such as HDMI, DVI, USB2.0, and IEEE 1394.

**Features**

- Low capacitance of 0.65pF (TYP) per I/O
- ESD protection of ±8kV contact discharge, ±15kV air discharge, (IEC 61000-4-2)
- EFT protection, IEC 61000-4-4, 40A (5/50ns)
- Low leakage current of 0.5μA (MAX) at 5V
- Small SC70 (JEDEC MO-203) package saves board space
- Lightning Protection, IEC 61000-4-5, 2nd edition 2.5A (8/20μs)
- RoHS compliant and lead-free
- AEC-Q101 qualified

**Applications**

- Computer Peripherals
- Mobile Phones
- PDA’s
- Digital Cameras
- Network Hardware/Ports
- Test Equipment
- Medical Equipment

**Application Example**

A single 4 channel SP300x-04 device can be used to protect four of the data lines in a HDMI/DVI interface. Two (2) SP300x-04 devices provide protection for the main data lines. Low voltage ASIC HDMI/DVI drivers can also be protected with the SP300x-04, the +V_CC pins on the SP300x-04 can be substituted with a suitable bypass capacitor or in some backdrive applications the +V_CC of the SP300x-04 can be floated or NC.
