SPXV SERIES SOLAR FUSE

1500 Vdc • 6 – 30 A

**Description**
The Littelfuse SPXV solar string fuse is designed specifically for 6-30 A 1500 Vdc applications.

**Features/Benefits**
- 10 x 85 mm package size
- UL 248-19 Listed
- Meets IEC 60269-6 electrical performance requirements
- 30,000 A interrupting rating

**Applications**
- Inverters
- Combiner boxes

**Web Resources**
Download technical resources at: littelfuse.com/spxv

**Specifications**

- **Voltage Rating**: 1500 Vdc
- **Amperage Rating**: 6, 8, 10, 12, 15, 20, 25, 30 A
- **Interrupting Rating**: 15 kA (UL 248-19), 30 kA (Self-Certified)
- **Time Constant**: ≤ 1ms
- **Material**
  - Body: Melamine
  - Caps: Copper Alloy (Nickel Plated)
- **Approvals**
  - UL 248-19 Listed (File: E339112)
  - RoHS Compliant
  - REACH
- **Country of Origin**: Mexico

**Part Numbering System**

```
Series  SPXV  Amp Code  Package Quantity
SPXV  6     T  = 10
SPXV  20    L  = 50
```

**Dimensions mm (inches)**

  - 13.72 (0.540) mm
  - 10.00 (0.394) mm
POWR-GARD® 1500 V Solar Rated Products

SPXI SERIES IN-LINE SOLAR FUSES

1500 Vdc • 2.5-30 A (Patent Pending)

Description

The Littelfuse SPXI solar fuse is designed to integrate into an in-line assembly within a wire harness. The fuse provides photovoltaic (PV) protection that meets UL 248-19 for photovoltaic applications. The SPXI can be electrically insulated by either overmolding or using approved heat-shrink.

Features/Benefits

- UL 248-19 Recognized
- Meets IEC 60269-6 electrical performance requirements
- 30,000 A interrupting rating
- No fuse holder required

Applications

- Photovoltaic wire harness

SPNH SERIES SOLAR FUSE

1500 Vdc • 50-400 A • NH Style

Description
The SPNH series has been designed to meet the emerging circuit protection needs for 1500 volt photovoltaic systems. These fuses provide full range protection for all potential overcurrent conditions that exist in PV applications. Suitable for PV inverter protection and array combiner applications.

Features/Benefits
- Meets UL and IEC photovoltaic standards
- Compact NH XL Sizes
- Low Watt Loss Design
- 1500Vdc rating for emerging market needs
- Designed to protect against a full range of overcurrents

Applications
- Inverters
- Re-combiner boxes
- Array/Re-combiner application
- PV Inverter DC input protection

Description

The SPFJ series is the smallest 1000 Vdc 70-450 A photovoltaic fuse available in the market. The SPFJ series is manufactured in Class J case sizes that allows for both fuse holder and busbar mounting configuration. The SPFJ meets both UL and IEC requirements.

Features/Benefits

- Meets UL and IEC photovoltaic standards
- Small footprint reduces panel size
- Flexibility of fuse holder or busbar mounting
- Higher amperage solar fuses in standard sizes
- UL Listed branch and feeder circuit rated
- Class J case sizes for the 125-450 A ratings

Applications

- Inverters
- Re-combiner boxes

Description

The SPF Solar Protection Fuse series has been specifically designed for the protection of photovoltaic (PV) systems. This family of Midget style fuses (10 x 38 mm) can safely protect PV modules and conductors from reverse-overcurrent conditions.

As PV systems have grown in size, so have the corresponding voltage requirements. This increase in system voltage has typically been intended to minimize power loss associated with long conductor runs. Standard circuit protection devices are not designed to completely protect photovoltaic panels. However, the SPF series is UL Listed to safely interrupt faulted circuits up to this demanding voltage level.

Littelfuse offers 14 ampere ratings to match specific requirements in a variety of applications.

Features/Benefits

- Meets UL and IEC photovoltaic standards
- UL 248-19 Listed 1000 Vdc maximum
- 1-30 A ratings available
- 20,000 A Interrupting Rating - 1A - 20A
- 50,000 A Interrupting Rating - 25A - 30A
- Both PCB mount and dead-front holder options available

Applications

- Inverters
- Combiner boxes
- Battery charge controllers

LFJ1000 SERIES SOLAR FUSE BLOCK

1000 VDC • Clip-to-Box • Stud-to-Stud • Clip-to-Stud

Description
The LFJ1000 series fuse block is specifically designed for the Littelfuse SPFJ 1000 V Solar Fuse. It meets UL electrical requirements, is available in multiple ampereages, and comes in a variety of fuse mounting and termination configurations; fuse clip to box lug, fuse stud to wire stud and fuse clip to wire stud.

Features/Benefits
• Narrow width increases space savings
• Range of amperages to match all SPFJ fuse options
• Box Lug termination style accommodates a wide range of cable sizes
• Stud-mounted option increases convenience
• Approval for use with copper or aluminum lugs allowing for design flexibility

Specifications
Voltage Ratings 1000 VDC
Ampere Ratings 200, 400, 450 A
Flammability Rating UL94 V-0
Termination Type Box Lug or Stud Mount
Base Temp Rating 130° C
Approvals UL 4248-18 Listed
File: E345481 Vol. 1

Environmental

SPFRHV 1000 VDC Fuse Block

Description
The Littelfuse SPFRHV fuse block is designed to hold Littelfuse high amperage (250-400 A) SPFR fuses.

Specifications
- Voltage Rating: 1000 VDC
- Amperage Rating: 250 - 400 A
- Approvals: UL 4248 Recognized (File: E14721), CSA (File: 29862)
- Environmental: RoHS Compliant

LPHV POWR-SAFE FUSE HOLDERS

1000 VDC

Description
The Littelfuse LPHV fuse holder is designed to house 1000 V fuses. It is not designed for load break but is ideal for isolating photovoltaic module strings for maintenance and meets UL requirements for 1000 V solar fuse protection.

Features/Benefits
- Touch-safe design offers protection when replacing fuses
- Compact design
- 35 mm DIN Rail Mountable
- Available in 1-, 2-, 3- and 4-pole configurations
- No fuse pullers or tools required for fuse removal

Specifications
- Voltage Rating: 1000 VDC
- Amperage Rating: 30 A
- SCCR Rating: 20 kA
- Power Dissipation: 4 W Maximum
- Fuse Type: 10 x 38 mm up to 1000 VDC
- Material: Thermoplastic
- Flammability Rating: UL94 V-0
- Approval: Self-certified 1000 VDC
- IEC 60269-2, -4, -6
- Environmental: RoHS compliant, Lead (Pb) Free

Multi-Pole Assembly Kit
Kits are used to create multi-pole holders from 1-pole LPHV fuse holders. Please contact factory for more information.

Littelfuse.com/solar
Description
A key objective for panel designers is safe distribution of power to multiple fuse holders in a compact design. The Littelfuse UL 508 Listed bus bar system eliminates most wire terminations in a timesaving package. A power distribution block and associated conductors are no longer needed to feed multiple POWER-safe fuse holders.

Features/Benefits
- Touch-safe design offers protection when replacing fuses
- Compact design
- 35mm DIN-rail mountable
- Available in one and three phase configurations
- Can be cut down to optimal size

Recommended Fuse Holders
Littelfuse LFPSM / LFPSC / LPSM / LPSC (600 V)
Littelfuse LPHV (1000 V)

Recommended Fuses
Class CC
Midget-Style (10 x 38 mm)
KLKD SERIES 10X38 FUSES

600 Vac/dc • 1/10-30 A • Fast Acting

Description
The KLKD fuse series is fast-acting with a high DC voltage rating. This family of Midget style fuses (10 x 38 mm) is used in solar combiner boxes and in circuits with DC fault currents up to 50,000 amperes. KLKD fuses are available in standard and board-mount configurations.

In addition, the KLKD series has been designed to meet both the UL and IEC photovoltaic fuse standards.

Littelfuse offers a wide range of ampere ratings to match specific requirements in a variety of applications.

Features/Benefits
- Designed to UL and IEC photovoltaic specifications
- 1/10 - 30 A ratings available
- 50,000 A Interrupting Rating
- Available in ferrule or PCB mount options
- 1-5 A meets UL1741 GFDI requirements

Applications
- Combiner boxes and Inverters
- Power supplies
- Desktop meters

POWR-GARD® 600 V Solar Rated Products

POWR-BLOKS™
Distribution Blocks • Splicer Blocks • Covers

Connectors
Box lug connectors are designed for use with a single, solid or class B or C stranded conductor. Use of more than one conductor per connector opening or use of extra-flexible, fine-stranded conductors, such as welding cable, voids the UL Listing and may cause overheating. Manufacturers of cable terminations can furnish crimp-on sleeves for fine stranded conductors which permit these conductors to be used with box lugs.

Ampere Ratings
The ampere rating per pole for power distribution blocks is based on the line ampacity of 75°C insulated conductors per 2014 NEC® Table 310.16 (this reference has changed to Table 310.15(B)(16) effective with the 2017 NEC®). If 60°C insulated conductors are used, load must not exceed the ampacity of 60°C conductors. Use of conductors rated in excess of 75°C is permitted (for example 90°C), however, load must not exceed the ampacity of 75°C conductors.

Specifications
- **Voltage Rating**: 600 V
- **Current Rating**: Based on 2014 NEC Table 310.16 (or NEC Table 310.15(B)(16) effective with 2017 NEC), using 75°C copper wire
- **Material**: Phenolic rated at 150°C and Thermoplastic rated at 125°C (LD1400 and LS1300 series only)
- **Connector**: Standard: Highly conductive aluminum, tin plated Copper: Highly conductive copper, tin plated
- **Flammability Rating**: UL94 V-0
- **Approvals**: UL Recognized - OLD/OLS Series (File: E171395) LFD/LFS Series (File: E309688) CSA Certified - OLD/OLS Series (File: LR700111) LFD/LFS Series (File: 007316_0_000) UL Listed - OLD5xxxx (File: E482231)
- **Environmental**: RoHS compliant, Lead (Pb) free

Description
POWR-BLOKS™ power distribution blocks offer a safe, convenient way of splicing cables, providing a fixed junction tap-off point or splitting primary power into secondary circuits. Lx2xxx-DIN series offers integral DIN-Rail mount and an optional hinged safety cover.
Optional power distribution block covers provide protection against accidental shorting between poles caused by loose wires, tools, or other conductive material. They also protect personnel from accidentally contacting energized connectors. To order protective covers, match the number of poles for the block to the cover.

Applications
Typical applications include heating, air conditioning and refrigeration systems, elevator systems, material handling equipment, control panels, motor controls, switchgear, and anywhere power needs to be distributed to more than one load.

Description

Half-Bridge Circuit IGBT Modules offer the high efficiency and fast switching speeds of modern IGBT technology in a robust and flexible format. Used for power control applications, Littelfuse offers its first IGBT modules for flexible and efficient motor control and inverter applications.

Features

• Ultra Low Loss
• High Ruggedness
• High Short Circuit Capability
• Positive Temperature Coefficient
• With Fast Free-Wheeling Diodes

Benefits

• High efficiency and switching speed
• High reliability in demanding applications
• Reduced protection needs
• Easily paralleled
• Integrated solution in compact module package

Applications

• AC Motor Control
• Inverter
• Motion / Servo Control
• Power Supplies
• Photovoltaic / Fuel Cell

TVS (TRANSIENT VOLTAGE SUPPRESSION) DIODES

What Are Voltage Transients?

Voltage transients are unwanted short duration surges of electrical energy. They may result from the sudden release of previously stored energy, and can come from internal and external sources. If the voltage magnitude of the transient is large enough, circuit component damage or malfunction of the circuit may result.

Transients can occur either repeatedly or as random impulses. Repeatable transients are frequently caused by the operation of other system components, such as motors, generators or the switching of reactive circuit components. Random transients, are often caused by lightning, electrostatic discharge (ESD), and other outdoor environment events.

TVS and Solar Inverter Protection

Integration of Transient Voltage Suppression (TVS) components within solar system designs help to prevent the damaging effects of transient events and assure compliance to safety and reliability standards. Solar power inverters are vulnerable to transient voltage effects and its direct connection to other system components allows transient voltage transfer. For example:

- Lightning-induced transient events may pass through the solar array and outdoor cabling to the inverter.
- Transients originating from the outside utility power grid may pass through the main circuit panel and cabling to the inverter.
- Startup of motorized equipment enable vulnerabilities produced by repeat load changes.
- Electrostatic discharge events generated internal and external to the system may pass between the inverter and sensitive electronic control equipment.

It is important to build surge withstand ability in the inverter and at locations before damaging transients may reach sensitive equipment.

Transient Voltage Suppression (TVS) Diodes

TVS Diodes are used to protect semiconductor components from high-voltage transients. Their p-n junctions have a larger cross-sectional area than those of a normal diode, allowing them to conduct large currents to ground without sustaining damage. Littelfuse supplies TVS Diodes with peak power ratings from 200 W to 30 kW, and reverse standoff voltages from 5 V to 512 V.

OVERVOLTAGE SUPPRESSION VARISTORS

Protection Application and Needs

Description:
Microprocessor-controlled inverter with the AC output synchronized to the AC grid stores energy in utility company and maximizes PV array energy output.

Threats:
- Power surges on AC or DC Input and AC Output
- ESD threats through the communication network

Solutions:
1. AC Input: Fuse / MOV / GDT
2. DC Input: DC-rated fuse / Unidirectional TVS / MOV
3. AC Output: Fuse / TVS / MOV
4. Local Ethernet: MLV / SPA
5. Outside Ethernet: SEP series SIDACtor® device

Example: Hybrid Solar Inverter Configuration

Varistor Products

Varistors possess characteristics that divert transient currents away from sensitive components. Littelfuse offers two types: miniature surface mount Multi-Layer Varistors (MLVs) for small electronics applications and Metal Oxide Varistors (MOVs) for higher energy applications. For more information visit Littelfuse.com/varistor

**Description**

The SE-601 is a microprocessor-based ground-fault relay for ungrounded dc systems. It provides sensitive ground-fault protection without the problems associated with nuisance tripping. Ground-fault current is sensed using an SE-GRM Series Ground-Reference Module—a resistor network that limits ground-fault current to 25 mA. The SE-601 is used on ungrounded dc systems ranging from industrial 24-Vdc control circuits to 1000-Vdc solar and transportation systems.

**Accessories**

- **SE-GRM Series Ground-Reference Module**
  Required accessory, used to connect the SE-601 DC Ground-Fault Monitor to the DC bus.

- **PGA-0500 Analog % Current Meter**
  Optional panel-mounted analog meter displays ground-fault current as a percentage of 22 mA.

**Specifications**

- **IEEE Device Numbers**
  DC Overcurrent Relay (76G)

- **Input Voltage**
  See ordering information

- **Dimensions**
  H 75 mm (3.0"), W 55 mm (2.2"), D 115 mm (4.5"

- **Trip Level Settings**

**EL731 SERIES**

AC/DC Sensitive Earth-Leakage Relay

**Description**

The EL731 is a microprocessor-based AC/DC Sensitive Earth-Leakage Relay that offers complete coverage for all frequencies from 0 to 6,000 Hz. Two CTs are required for the entire frequency range, or one CT can be used for only low- or high-frequency detection. An RTD/PTC sensor input allows over-temperature protection for a motor or drive. The EL731 offers metering, password-protected alarm and trip settings and optional network communications. It is primarily used to add low-level ground-fault protection to variable-speed drives, and to dc circuits.

**Accessories**

- **EFCT Series Earth-Fault Current Transformer**
  Required zero-sequence current transformer specifically designed for low level detection.

- **AC700-CUA Series Communication Adapter**
  Optional network-interface and firmware-upgrade communications adapters field-install in EL731.

- **AC700-SMK DIN-rail & Surface-mount Adapter**
  EL731 plugs into adapter for back-plane mounting.

**Note:** When building a part number, replace the “X” with “1” for AS/NZS 2081:2011 Compliant product, “0” otherwise.
With over 16.5 million devices installed in photovoltaic power systems, Littelfuse understands the global challenges of the solar market. Littelfuse offers numerous circuit-protection products that are uniquely suited to protect the equipment and systems subject to the harsh environments of standard photovoltaic installations.
